Online Plug-in for Windows 12.3

The Online Plug-in for Windows 12.3 provides bug fixes. For details about system requirements, installation, configuration, and deployment, refer to the archived documentation for [Online Plug-in for Windows 12.1](#).

Fixed Issues

For Online Plug-in issues fixed in this release, see [Issues Fixed in Online Plug-in 12.3 for Windows](#).

Licensing Documentation

For licensing documentation, see [Licensing Your Product](#).

Known Issues

- In Windows XP and Windows 2003 clients, the local client's language bar is visible on sessions when minimized to tray. [#298853]
- A local application's window may come in front of the Internet Explorer window when launching an application from Web Interface immediately after installing the client. [#301234]
- Hotkeys - for example, the Ctrl+F1 combination - do not work in virtual desktop sessions if the Desktop Viewer is enabled. [#LA0303]
