Melio 6 introduces the Citrix Independent Storage Architecture (ISA), which provides storage aggregation and virtualization across servers accessible to all XenApp and XenDesktop instances in the customer’s environment.

Melio 6 is data and storage virtualization software for high availability and scale-out of XenApp and XenDesktop. Melio 6 improves the economics and elasticity of existing server and storage infrastructure, creating the perfect hyper-converged or converged IT environment.

Melio 6 makes shared storage resources accessible from XenApp and XenDesktop in a customer’s environment, in one location or across multiple locations.

**What is Citrix Melio 6?**
