# Doc Finder 1.0

Doc Finder is a companion to Citrix Receiver that enables mobile devices to open content published in your XenApp deployment. Doc Finder also makes it easy for your users to find and securely open enterprise documents using their mobile devices. When your users click on files in Doc Finder, it automatically opens the published applications needed to view them.

## System Requirements

Doc Finder requires a XenApp deployment running one of the following products:

- Citrix XenApp 6 for Windows Server 2008 R2
- Citrix XenApp 5 Feature Pack 3 for Windows Server 2008
- Citrix XenApp 5 Feature Pack for Windows Server 2008
- Citrix XenApp 5 for Windows Server 2008
- Citrix XenApp 5 Feature Pack 3 for Windows Server 2003
- Citrix XenApp 5 Feature Pack 2 for Windows Server 2003
- Citrix XenApp 5 for Windows Server 2003
- Citrix Presentation Server 4.5

Doc Finder is supported on any mobile device that supports Citrix Receiver. For information about support for a specific device, see Citrix Receiver documentation for that device.

## Delivering Doc Finder to Your Users

Deliver Doc Finder to your users by publishing it on XenApp servers in your deployment.

**Important:** Install and publish Doc Finder on each XenApp server that delivers applications or documents to your mobile device users.

- Emphasize Doc Finder for your mobile device users by listing it in Citrix Receiver's Featured list. When publishing Doc Finder on your XenApp servers, append the string `KEYWORDS:Featured` to value of the Application description field.
- Publish Doc Finder with the title "Citrix Doc Finder."
