XenApp 5 Feature Pack 3 for Windows Server 2003

XenApp 5 Feature Pack 3 for Windows Server 2003 uses a hotfix to deliver server-side content fetching for HDX MediaStream for Flash to XenApp 5 Feature Pack 2 on Windows Server 2003. Server-side content fetching allows you to specify Web sites whose Flash content can be downloaded to the XenApp server and sent to a user device. This hotfix requires the Citrix online plug-in 12.0.

To download this hotfix and find more information:

- For 32-bit editions of XenApp, see Knowledge Center article [CTX124145](#)
- For 64-bit editions of XenApp, see Knowledge Center article [CTX124146](#)

XenApp 5 Feature Pack 3 for Windows Server 2003 also makes available enhancements to application streaming, profile management, and other XenApp features. To download these features, including the Citrix online plug-in 12.0, go to www.citrix.com/downloads.
