🏠 | Citrix DaaS

Citrix DaaS document history

📅 December 17, 2024

Contributed by: 🅒 🅒

The following table describes important changes to the Citrix DaaS (formerly Citrix Virtual Apps and Desktops service) product documentation until Nov 2024. These changes can be in addition to items in **What's new**.

Date	Change	Description
27 Nov 2024	Updated topic - Register Citrix Infrastructure Monitor on Monitor UI	Added steps to register Citrix Infrastructure Monitor using Remote PowerShell SDK. Learn more.
25 Nov 2024	Updated topic - Get started: Plan and build a deployment	Removed the references to Citrix Success Center as it is decommissioned.
25 Nov 2024	Updated topic - What's new	Image management is now Generally Available. Learn more.
21 Nov 2024	Updated topic - What's new	WebSocket communication. Learn more.
20 Nov 2024	Updated topic - What's new	Connecting Citrix Components from the UI and enhancement to Advanced Alert Policies. Learn more.
20 Nov 2024	Updated topic - What's new	Support to configure secondary VMs scale up or scale down list for MCS-created catalogs on Azure. Learn more.
18 Nov 2024	Updated topic - What's new	Delivery group details enhanced with policy information. Learn more.
14 Nov 2024	Updated topic - What's new	Support for multi-region snapshot of the disk or an image of the disk as master image in GCP. Learn more.
14 Nov 2024	Updated topic - What's new	Support for converting a non-machine profile-based machine catalog to machine profile-based machine catalog in VMware environment. Learn more.
05 Nov 2024	Updated topic - What's new	Studio AWS Quick Deploy: Support for adding non-BYOL-enabled AWS accounts Learn more.
05 Nov 2024	Updated topic - What's new	Studio: Support for provisioning persistent VMs on Windows Server OS using Full Copy Clone. Learn more.
05 Nov 2024	Updated topic - What's new	Backup and restore using Studio is now Generally Available. Learn more.
05 Nov 2024	Updated topic - What's new	Configuration guides widget on the Studio Home Page. Learn more.
05 Nov 2024	Updated topic - What's new	Check resiliency configurations guide. Learn more.
05 Nov 2024	Updated topic - What's new	DaaS get-started guide now generally available. Learn more.

Date	Change	Description
05 Nov 2024	Updated topic – What's new	Enhanced domain selection. Learn more.
04 Nov 2024	Updated topic – What's new	Validate configuration before creating an MCS machine catalog in AWS environments. Learn more.
04 Nov 2024	Update topic – What's new	Update to **Performance Metrics** panel, enhancement to **Filters** tab, and enhancement to ended session [Preview]. Learn more.
25 Oct 2024	Updated topic – What's new	Enroll persistent machines of hybrid Azure AD joined type into Microsoft Intune for co-management. Learn more.
25 Oct 2024	Updated topic – What's new	Diagnose conditional authentication failures. Learn more.
23 Oct 2024	Updated topic – What's new	Service accounts for machine identity management. Learn more.
21 Oct 2024	Updated topic – What's new	Support to select an Instance template as a machine profile. Learn more.
21 Oct 2024	Updated topic – What's new	Export a machine profile to an ARM template spec. Learn more.
21 Oct 2024	Updated topic – What's new	MCS catalogs: AWS launch templates support. Learn more.
21 Oct 2024	Updated topic – What's new	Retrieve Connector Appliance information. Learn more.
21 Oct 2024	Updated topic – What's new	Reboot schedules for hibernated VMs. Learn more.
21 Oct 2024	Updated topic – What's new	Data caching for the Images node. Learn more.
21 Oct 2024	Updated topic – What's new	Configuration logs labeling. Learn more.
18 Oct 2024	Updated topic – What's new	Support for creating a host connection using Azure Managed Identity. Learn more.
18 Oct 2024	Updated topic – What's new	Support for Boot Integrity Monitoring in Azure. Learn more.
18 Oct 2024	Updated topic – What's new	Filter empty resource groups. Learn more.
18 Oct 2024	Updated topic – What's new	Support for creating preformatted WBC disk catalogs in Azure. Learn more.
18 Oct 2024	Updated topic – What's new	Delete WBC disk at shutdown for MCS provisioned Citrix Provisioning catalogs. Learn more.
18 Oct 2024	Updated topic – What's new	Support for creating a network security group. Learn more.
18 Oct 2024	Updated topic – What's new	Support for using Azure temporary disk as a WBC disk for existing MCS machine catalogs. Learn more.
18 Oct 2024	Updated topic – Create a machine catalog using an Azure Resource Manager image in Studio	Added details regarding preparation VM. Learn more.
18 Oct 2024	Updated topic – What's new	Errors and warnings center on the Studio Home page. Learn more.

Date	Change	Description
15 Oct 2024	Updated topic - What's new	Enhancement to **Trends** page. Learn more.
14 Oct 2024	Added topic - Best practices for backup and restore	Added the topic for best practices for backup and restore. Learn more.
09 Oct 2024	Updated topic - OS, Directory Type, and Session Support Compatibility	Updated the note in this section. Learn more.
09 Oct 2024	Updated topic - OS, Directory Type, and Session Support Compatibility	Updated the note in this section. Learn more.
01 Oct 2024	Updated topic - Install VDAs	Removed outdated VDA related information and provided a link to CVAD Install VDAs topic.
24 Sep 2024	Updated topic - Upgrade VDAs	Removed a Pre-requisite which was not relevant. Learn More
24 Sep 2024	Removed topic - Configure a hosting connection to allow fixed egress IPs	The topic is not yet GA.
19 Sep 2024	Updated topic - Repair the identity information of active computer accounts	Replaced parameter `ResetIdentityInfo` with `-Recreate`. Learn more.
19 Sep 2024	Updated topic - What's new	Validate permissions on host connection in Azure. Learn more.
19 Sep 2024	Updated topic - What's new	Fixed egress IPs for securing cloud resources. Learn more.
19 Sep 2024	Updated topic - What's new	Repair the identity information of active computer accounts in GCP, SCVMM, and XenServer. Learn more.
19 Sep 2024	Updated topic - What's new	Support for creating Azure AD joined catalogs enrolled in Microsoft Intune for non-persistent VMs. Learn more.
19 Sep 2024	Updated topic - What's new	New application publishing option for associating file types with applications. Learn more.
19 Sep 2024	Updated topic - What's new	Enhancements to the Preview widget. Learn more.
18 Sep 2024	Added topic - Option to export data from the **Cost optimization** page	Option to export data from the **Cost optimization** page. Learn More.
13 Sep 2024	Added topic - Launch Hybrid Azure AD joined VDA sessions	Launch Hybrid Azure AD joined VDA sessions. Learn More.
10 Sep 2024	Added topic - Backup or Migrate your configuration	Added several topics related to backup and migrate. Learn More.
10 Sep 2024	Updated topic - What's New	Webhook configuration using PowerShell SDK Learn More.
10 Sep 2024	Updated topic - What's New	Webhook configuration using PowerShell SDKLearn More
10 Sep 2024	Updated topic - What's New	VUS Multi Release Support (Tech Preview). Learn More
10 Sep 2024	Updated topic - Upgrade VDAs	Updated powershell cmdlets to new functionalaties
06 Sep 2024	Added topic - Features in Technical Preview	Added list of all features that are in Technical Preview. Learn more.
05 Sep 2024	Updated topic - What's new	Enhanced policy assignment experience. Learn more.

Date	Change	Description
29 Aug 2024	Updated topic - Cost optimization	Restructured the Cost optimization page and added additional information on cost calculation. Learn more.
29 Aug 2024	Updated topic - Install VDAs	Removed the section VDA supportability tools. Learn more.
27 Aug 2024	Updated topic - What's new	Redesigned DaaS navigation pane. Learn more.
27 Aug 2024	Updated topic - What's new	Validate permissions on host connection in AWS. Learn more.
27 Aug 2024	Updated topic - What's new	MCS creates ID Disks with GP3 volume type in AWS environment. Learn more.
13 Aug 2024	Updated topic - What's new	Persist BDM storage type as standard SSD in Azure. Learn more.
13 Aug 2024	Updated topic - What's new	Customize the Home Page. Learn more.
13 Aug 2024	Updated topic - What's new	Misconfiguration details added for Zone alerts. Learn more.
13 Aug 2024	Updated topic - What's new	Policies UI improved for better user experience. Learn more.
13 Aug 2024	Updated topic - What's new	Data caching for the **Details** tab on Full Configuration nodes. Learn more.
07 Aug 2024	Updated topic - What's new	Two new features in Citrix Monitor - Application usage monitoring charts on Dashboard and option to view and filter session type and last boot time. Learn more
02 Aug 2024	Updated topic - What's new	Convert legacy MCS catalogs to machine profile-based catalogs in Azure and AWS. Learn more
01 Aug 2024	Updated topic - What's new	Support for backup VM sizes configuration. Learn more.
25 Jul 2024	Updated topic - What's new	Configure required Azure host connection permissions. Learn more.
23 Jul 2024	Updated topic - What's new	Enhanced Performance Metrics panel. Learn more.
18 Jul 2024	Updated topic - What's new	Six new features in Citrix Monitor - Integrations and data exports, Enhancement on triaging user profile load issues, Advanced alert policies, Enhancements on alert content, Local Host Cache config sync failure alert monitoring, and Failed power on action and Failed Power off action alert. Learn more.
17 Jul 2024	Updated topic - What's new	Infrastructure monitoring (Preview) and Infrastructure policies (Preview). Learn more.
17 Jul 2024	Updated topic - What's new	Increased limit of replicas per image version in Azure. Learn more.
17 Jul 2024	Updated topic - What's new	Managing prepared images with the Images node. Learn more.
16 Jul 2024	Updated topic - What's new	Detailed misconfiguration report. Learn more.
15 Jul 2024	Updated topic - What's new	Install the FlexApp One agent. Learn more.
15 Jul 2024	Updated topic - What's new	Introducing user and desktop display names in the Search node. Learn more.

Date	Change	Description
15 Jul 2024	Updated topic - What's new	Modify desktop display names using Full Configuration. **Learn more**.
15 Jul 2024	Updated topic - What's new	Support for Azure's nested virtualization. **Learn more**.
15 Jul 2024	Updated topic - What's new	Support for inheriting labels from a machine profile source to the VMs and disks in GCP. **Learn more**.
15 Jul 2024	Updated topic - What's new	Support for inheriting custom tags from machine profile to the provisioned VMs. **Learn more**.
15 Jul 2024	Updated topic - What's new	Support for on-demand capacity reservation in Azure. **Learn more**.
15 Jul 2024	Updated topic - What's new	Support for placing WBC disk on the same storage location as OS disk. **Learn more**.
11 Jul 2024	Updated topic - What's new	Enhancement to Cost savings page. **Learn more**.
11 Jul 2024	Updated topic - What's new	Decoupled Workspaces, allow userGroup assignment. **Learn more**.
11 Jul 2024	Updated topic - What's new	Support to import Workspace images type. **Learn more**.
11 Jul 2024	Updated topic - What's new	Option to update Write-back cache setting post creation for Machine Creation Service (MCS) catalogs in the Google Cloud Platform. **Learn more**.
11 Jul 2024	Updated topic - What's new	Option for manually managing the service principal's role for Azure AD joined device management. **Learn more**.
11 Jul 2024	Updated topic - What's new	Export function extended to all nodes in Full Configuration. **Learn more**.
11 Jul 2024	Updated topic - What's new	Support for adding notes for maintenance mode. **Learn more**.
11 Jul 2024	Updated topic - What's new	Data caching for the Zones and Policies nodes. **Learn more**.
03 Jul 2024	Updated topic - What's new	Get warnings messages for hibernation failure. **Learn more**.
02 Jul 2024	Updated topic - What's new	Option to update write-back cache settings post creation for Machine Creation Service (MCS) catalogs in the hypervisors. **Learn more**.
01 Jul 2024	Updated topic - What's new	Six new features in Citrix Monitor - Enhancement to Session Performance tab, Diagnose historical user sessions [Preview], Machine uptime alert, Published desktop name, Infrastructure rightsizing, and Local Host Cache activity dashboard. **Learn more**.
01 Jul 2024	Updated topic - What's new	Specify CMEK global and regional keys. **Learn more**.
21 Jun 2024	Updated topic - What's new	Full Configuration: Support for provisioning VMWare VMs using machine profile. **Learn more**.
18 Jun 2024	Updated topic - Citrix DaaS Remote PowerShell SDK	Updated the versions supported for PowerShell **Learn more**
14 Jun 2024	Updated topic - What's new	Create delivery groups exclusively for suspend-capable VMs using Full Configuration. **Learn more**.

Date	Change	Description
14 Jun 2024	Updated topic - What's new	Enhanced Performance Metrics panel and improved Session Logon view. Learn more.
13 Jun 2024	Updated topic - What's new	Unregistered machines alert. Learn more.
13 Jun 2024	Updated topic - What's new	Shared or Dedicated directory connections. Learn more.
13 Jun 2024	Updated topic - What's new	Contextual App Protection. Learn more.
13 Jun 2024	Updated topic - What's new	Enhanced default view settings for machine catalogs, delivery groups, and applications. Learn more.
13 Jun 2024	Updated topic - What's new	Data caching for the StoreFront node. Learn more.
13 Jun 2024	Updated topic - What's new	Improved user name search in machine catalog creation. Learn more.
13 Jun 2024	Updated topic - What's new	Simplified subnet updates for machine catalogs Learn more.
05 Jun 2024	Updated topic - What's new	Support for creating resource groups during Azure catalog creation (for PVS). Learn more.
31 May 2024	Updated topic - What's new	Secure HDX Learn more.
28 May 2024	Updated topic - What's new	Azure GPU hibernation support (Preview) Learn more.
17 May 2024	Updated topic - What's new	Citrix Provisioning catalogs support for hybrid Azure AD join extended to Full Configuration Learn more.
17 May 2024	Updated topic - What's new	Enhancements to Full Configuration contextual help. Learn more.
17 May 2024	Updated topic - What's new	Enhanced configuration logging: tracking membership changes for delivery groups. Learn more.
17 May 2024	Updated topic - What's new	Customize the tab order on the Search node. Learn more.
17 May 2024	Updated topic - What's new	Data caching for the Machine Catalogs node. Learn more.
17 May 2024	Updated topic - What's new	Support for creating Citrix Provisioning catalogs using MCS PowerShell commands in VMware. Learn more.
17 May 2024	Updated Topic - Failure Detection and Mitigation in VDA Upgrade Service and Support VDA Updates from a local file share that VDAs have access	VDA Upgrades
15 May 2024	Updated topic - What's new	Full Configuration support for delivering packaged applications to single-session static desktops and office PCs. Learn more.
15 May 2024	Updated topic - What's new	Full Configuration support for delivering packaged applications in FlexApp format. Learn more.
13 May 2024	Updated topic - What's new	Update in the OData pagination limit. Learn more.

Date	Change	Description
08 May 2024	Updated topic - What's new	Support for creating and managing Azure confidential VMs using Full Configuration. Learn more.
08 May 2024	Updated topic - What's new	Support for displaying client IPs in configuration logs. Learn more.
06 May 2024	Updated topic - What's new	Support for capturing additional properties using machine profile source in AWS. Learn more.
06 May 2024	Updated topic - What's new	Repair the identity information of active computer accounts in AWS. Learn more.
06 May 2024	Updated topic - What's new	Support for encrypting ID disk of an MCS machine catalog VMs in AWS. Learn more.
06 May 2024	Updated topic - What's new	Configure security groups per network interface in AWS. Learn more.
30 Apr 2024	Updated topic - What's new	Support for newer version of Microsoft Teams. Learn more.
25 Apr 2024	Updated Topic - VDA environments with proxies for internet and URL filtering	VDA environments with proxies for internet and URL filtering
25 Apr 2024	Updated topic - What's new	Managing prepared images with the Images node. Learn more.
25 Apr 2024	Updated topic - What's new	Change disk encryption in Azure. Learn more.
25 Apr 2024	Updated topic - What's new	Support for modifying the page file settings. Learn more.
25 Apr 2024	Updated topic - What's new	Check for multiple NICs in VMware. Learn more.
25 Apr 2024	Updated topic - What's new	Support for creating Windows 11 VMs in GCP. Learn more.
25 Apr 2024	Added and updated topics - Virtual channel allow list	Virtual channel allow list.
19 Apr 2024	Updated topic - Importing your configuration to Citrix DaaS	Importing your configuration to Citrix DaaS.
19 Apr 2024	Updated topic - Rendezvous V2	Removed the known issue about Rendezvous V2 does not work if Rendezvous V1 was previously in use.
16 Apr 2024	Updated topic - What's new	Deprecated features in Full Configuration. Learn more.
16 Apr 2024	Updated topic - What's new	Enhanced service disruption experience in Full Configuration. Learn more.
16 Apr 2024	Updated topic - What's new	Data caching for the Hosting node. Learn more.
15 Apr 2024	Updated topic - Google Cloud virtualization environments	Updated the requirements section and changed the heading to Prerequisites. Learn more.
11 Apr 2024	Updated topic - What's new	Support for HDX Plus for Windows 365 Cloud PCs and Azure Virtual Desktops Learn more.
26 Mar 2024	Updated topic - What's new	Enrollment tool to register VDAs using WebSockets to machine catalogs Learn more.

Date	Change	Description
20 Mar 2024	Updated topic - Citrix DaaS for Amazon WorkSpaces Core (Preview)	About this preview and Connect your AWS account
18 Mar 2024	Updated topic - What's new	Full Configuration: Support for updating more Azure VM settings using machine profiles. Learn more.
18 Mar 2024	Updated topic - What's new	Full Configuration: Support for changing write-back cache properties for MCS-provisioned Azure VMs. Learn more.
14 Mar 2024	Added topics	Added action and column descriptions for machines, sessions, machine catalogs, and delivery groups. Learn more.
29 Feb 2024	Updated topic - What's new	New MCSIO support Learn more.
26 Feb 2024	Updated topic - What's new	Probes Overview enhancements. Learn more.
21 Feb 2024	Updated topic - What's new	Suspend VMs from the Workspace interface. Learn more.
21 Feb 2024	Updated topic - What's new	Image information on the Machine Catalogs page. Learn more.
21 Feb 2024	Updated topic - What's new	Full Configuration support for VDA enrollment token management. Learn more.
21 Feb 2024	Updated topic - What's new	PowerShell logging. Learn more.
21 Feb 2024	Updated topic - What's new	Enable Local Host Cache (LHC) for single-session pooled VDAs using Full Configuration. Learn more.
21 Feb 2024	Updated topic - What's new	Citrix Hypervisor rebranded to XenServer in Full Configuration. Learn more.
15 Feb 2024	Updated topic - What's new	Use Disk Encryption Set ID (DES ID) of the master image to encrypt all the disks of catalog VMs. Learn more.
15 Feb 2024	Updated topic - What's new	Update MCS tags to detect orphaned resources after migration. Learn more.
15 Feb 2024	Updated topic - What's new	Validate configuration before creating an MCS machine catalog. Learn more.
15 Feb 2024	Updated topic - What's new	Support for copying tags from a machine profile source to a VM in AWS. Learn more.
15 Feb 2024	Updated topic - What's new	SCVMM support for machine profile. Learn more.
15 Feb 2024	Updated topic - What's new	Azure support for using spot VMs with MCS. Learn more.
15 Feb 2024	Updated topic - What's new	Support for capturing diagnostic settings from a machine profile. Learn more.
15 Feb 2024	Updated topic - What's new	MCS support for managing different versions of a machine catalog. Learn more.
15 Feb 2024	Updated topic - What's new	Publish App-V, MSIX, and MSIX app attach packaged applications on single-session and shared desktop VDAs. Learn more.
13 Feb 2024	Updated topic - What's new	Support for play back live and recorded sessions. Learn more.

Date	Change	Description
09 Feb 2024	Updated topic - What's new	Support for viewing Microsoft Teams Optimization status. Also, modified screenshots to display the user interface improvements. Learn more.
09 Feb 2024	Added topic - Update the retention of DaaS configuration logs	Update the retention of DaaS configuration logs. Learn more
26 Jan 2024	Updated topic - What's new	Enhanced bidirectional content redirection configuration. Learn more.
26 Jan 2024	Updated topic - What's new	Support for restarting and shutting down single-session machines from the Search node's Sessions tab. Learn more.
26 Jan 2024	Updated topic - What's new	Support for accessing Global App Configuration Service from Full Configuration. Learn more.
26 Jan 2024	Updated topic - What's new	Support for managing user assignments for Citrix Cloud-managed delivery groups using Full Configuration. Learn more.
26 Jan 2024	Updated topic - What's new	Limit WEM console access to the WEM Full Access Administrator role. Learn more.
26 Jan 2024	Updated topic - What's new	Full Configuration: Azure catalogs support for inheriting DES settings from master images. Learn more.
26 Jan 2024	Updated topic - What's new	Enhanced search: More filters for enhanced precision. Learn more.
26 Jan 2024	Updated topic - What's new	Full Configuration: Support for selecting Google Cloud machine type for GCP machine catalogs. Learn more.
26 Jan 2024	Updated topic - What's new	Support for global and regional customer-managed encryption keys (CMEK) for provisioning GCP VMs. Learn more.
10 Jan 2024	Updated topic - Install VDAs	Removed the Citrix HyperV Filter Driver option. Learn more.
28 Dec 2023	Updated topic - What's new	Citrix Probe Agent authentication. Learn more.
21 Dec 2023	Updated topic - What's new	Send Message progress. Learn more.
15 Dec 2023	Updated topic - Rendezvous V2	Updated the content to include Hybrid Azure AD joined machines in Rendezvous V2. Learn more.
04 Dec 2023	Updated topic - What's new	Redesigned Access Policy UI for more flexible resource access control. Learn more.
30 Nov 2023	Updated topic - What's new	Support for creating Citrix Provisioning catalogs using Full Configuration interface. Learn more.
30 Nov 2023	Updated topic - What's new	Modified configuration limits. Learn more.
29 Nov 2023	Updated topic - What's new	A single option to retain VM and system disk during power cycles. Learn more.
29 Nov 2023	Updated topic - What's new	New capability in Full Configuration to filter machine sizes based on *Encryption at Host property* in machine profiles (Azure VMs specific). Learn more.
29 Nov 2023	Updated topic - What's new	Restrict backup and restore actions to the Full Administrator role. Learn more.

Date	Change	Description
29 Nov 2023	Updated topic - What's new	Data caching for the Search node. Learn more.
29 Nov 2023	Updated topic - What's new	Image information on the Machine Catalogs page. Learn more.
29 Nov 2023	Updated topic - What's new	Support for pinning search filters. Learn more.
21 Nov 2012	Updated topic - What's new	Support for associating metadata with configuration logs. Learn more.
20 Nov 2023	Updated topic - What's new	Introducing search for Application Groups. Learn more.
20 Nov 2023	Updated topic - Cryptographic operations	Added decrypt permission to the permission table in the Cryptographic operations section. Learn more.
20 Nov 2023	Updated topic - What's new	Ignore orphaned resources with specific tag. Learn more.
20 Nov 2023	Updated topic - What's new	Solution for SCCM duplicated GUID issue. Learn more.
20 Nov 2023	Updated topic - What's new	Repair the identity information of active computer accounts. Learn more.
20 Nov 2023	Updated topic - What's new	Get encryption at host information associated with a machine profile. Learn more.
20 Nov 2023	Updated topic - What's new	Repair the user certificates of hybrid Azure AD joined machine identities. Learn more.
20 Nov 2023	Updated topic - What's new	Certificate expiry warning support for Hybrid Azure AD joined machine catalogs. Learn more.
20 Nov 2023	Updated topic - What's new	Support for Azure confidential VMs (Preview). Learn more.
20 Nov 2023	Updated topic - What's new	Support for converting a non-machine profile-based machine catalog to machine profile-based machine catalog in AWS environment. Learn more.
20 Nov 2023	Updated topic - What's new	Support for Citrix-managed HPE Moonshot plug-in (Preview). Learn more.
20 Nov 2023	Updated topic - What's new	Ability to change memory and disk cache size. Learn more.
20 Nov 2023	Updated topic - What's new	Support for creating a customer-managed encryption key enabled catalog. Learn more.
20 Nov 2023	Updated topic - What's new	Update properties of individual VMs. Learn more.
20 Nov 2023	Updated topic - What's new	Ability to copy tags on all resources in Azure. Learn more.
20 Nov 2023	Updated topic - What's new	Session state updated to disconnected after the machine is suspended. Learn more.
17 Nov 2023	Updated topic - What's new	Support for creating AWS VMs that support hibernation. Learn more.
15 Nov 2023	Updated topic - What's new	Support for hibernation-capable VMs in Azure (Preview). Learn more.

Date	Change	Description
13 Nov 2023	Updated topic - What's new	DaaS get-started guide. Learn more.
08 Nov 2023	Updated topic - What's new	Assign drive letters to write-back cache disks using Full Configuration. Learn more.
08 Nov 2023	Updated topic - What's new	Support for changing various Azure machine properties using Full Configuration. Learn more.
08 Nov 2023	Updated topic - What's new	Use existing identity pools to create identities for MCS-provisioned machines. Learn more.
07 Nov 2023	Updated topic - What's new	Session Topology Learn more.
06 Nov 2023	Updated the content that `ShutdownDesktopsAfterUse` property is not available for new connections during a Local Host Cache event.	See Application and desktop support
06 Nov 2023	Device Posture service	Added a topic on Device Posture service. Learn more.
06 Nov 2023	Updated topic - What's new	Refine your Autoscale settings using historical usage. Learn more.
01 Nov 2023	General availability of adaptive access based on the user's network location.	Adaptive access based on the user's network location. Learn more.
27 Oct 2023	Added a note about changing the time zone for delivery groups	See Create and manage restart schedules for machines in a delivery group and Change user settings in a delivery group.
26 Oct 2023	Updated topic - What's new	Multiple NICs support for Azure VMs. Learn more.
19 Oct 2023	Updated topic - Limitations	Added a limitation about multi session non domain joined VDA Learn more.
18 Oct 2023	Updated topic - Troubleshooting	Updated the troubleshooting information image in the note. Learn more.
18 Oct 2023	Updated topic - What's new	Notification sign is shown to user or delivery group. Learn more.
18 Oct 2023	Updated topic - What's new	Support VDA version on settings page of create/edit policy. Learn more.
18 Oct 2023	Updated topic - What's new	Limit application visibility only supported for Active Directory accounts. Learn more.
18 Oct 2023	Updated topic - What's new	New UI option to delete VM records only from the Citrix site database. Learn more.
18 Oct 2023	Updated topic - What's new	Support for creating empty machine catalogs for non-MCS-provisioned machines. Learn more.
18 Oct 2023	Updated topic - What's new	Image Refresh enhancements. Learn more.
18 Oct 2023	Updated topic - What's new	Peak Autoscale Assigned PowerOn. Learn more.
13 Oct 2023	Updated topic - What's new	Monitor multiple Citrix DaaS instances (Preview) Learn more.

Date	Change	Description
11 Oct 2023	Updated topic - What's new	Preserve NIC settings on provisioned VMs. Learn more.
11 Oct 2023	Updated topic - What's new	Support for vSAN 8.0. Learn more.
11 Oct 2023	Updated topic - What's new	Detect Orphaned Azure resources. Learn more.
11 Oct 2023	Updated topic - What's new	New image update status. Learn more.
10 Oct 2023	Updated topic - What's new	PowerShell commands to create Auto-tags (Preview). Learn more.
21 Sep 2023	Updated topic - What's new	PowerShell commands to manage Local Host Cache (LHC). Learn more.
18 Sep 2023	Updated topic - What's new	Support for creating empty machine catalogs. Learn more.
18 Sep 2023	Updated topic - What's new	Removed the Leave user management to Citrix Cloud option. Learn more.
18 Sep 2023	Updated topic - What's new	Data caching for the Home node. Learn more.
18 Sep 2023	Updated topic - What's new	Search enhancements for applications. Learn more.
18 Sep 2023	Updated topic - What's new	Enhanced scope management: showing objects in folder view. Learn more.
18 Sep 2023	Updated topic - What's new	Removed the Azure Germany option. Learn more.
14 Sep 2023	Updated topic - What's new	Proactive service alerts in Full Configuration. Learn more.
30 Aug 2023	Updated topic - What's new	Full Configuration: Support for provisioning AWS and GCP VMs using machine profiles. Learn more.
24 Aug 2023	Updated topic - What's new	Introducing search functionality in Machine Catalogs and Delivery Groups nodes. Learn more.
22 Aug 2023	Updated topic - What's new	View endpoint device status in Session Launch Diagnostics using Device Posture. Learn more.
14 Aug 2023	Updated topic - What's new	New options in Full Configuration to route API requests to Azure and GCP through Citrix Cloud Connectors. Learn more.
14 Aug 2023	Updated topic - What's new	Search and filter enhancements. Learn more.
14 Aug 2023	Updated topic - What's new	VDA upgrade support for Azure Quick Deploy-created machine catalogs. Learn more.
11 Aug 2023	Updated topic - What's new	Ability to reset the OS disk of a persistent VM in an MCS created machine catalog in SCVMM. Learn more.
11 Aug 2023	Updated topic - What's new	Update properties of individual VMs. Learn more.
11 Aug 2023	Updated topic - What's new	Restrict upload and download of managed disks. Learn more.
11 Aug 2023	Updated topic - What's new	Support for assigning a specific drive letter to MCS I/O write-back cache disk. Learn more.

Date	Change	Description
11 Aug 2023	Updated topic - What's new	Support for machine profile in Citrix Hypervisor. Learn more.
11 Aug 2023	Updated topic - What's new	Support for creating a catalog of VMs enabled with Amazon Elastic Graphics. Learn more.
11 Aug 2023	Updated topic - What's new	Retry creating catalog after failure. Learn more.
11 Aug 2023	Updated topic - What's new	Permission for managing configuration sets. Learn more.
10 Aug 2023	Updated topic - What's new	New option in Full Configuration to enable cleanup of stale Azure AD joined devices. Learn more.
10 Aug 2023	Updated topic - What's new	Monitor image update status for catalogs using Full Configuration. Learn more.
02 Aug 2023	Updated topic - What's new	Secure environment for GCP managed traffic. Learn more.
17 Jul 2023	Updated topic - What's new	Support for creating persistent multi-session machines using Full Configuration. Learn more.
21 Jul 2023	Updated topic - What's new	Support for getting a list of orphaned resources on Azure. Learn more.
17 Jul 2023	Updated topic - What's new	Support for creating persistent multi-session machines using Full Configuration. Learn more.
17 Jul 2023	Updated topic - What's new	New capability in Full Configuration to filter the AWS AMI inventory. Learn more.
12 Jul 2023	Updated topic - Deprecation	Removed support for VMware vSphere 6.7. Learn more.
11 Jul 2023	Updated topic - What's new	Support for deleting Azure AD devices. Learn more.
11 Jul 2023	Updated topic - What's new	Support for machine profile in AWS environment. Learn more.
11 Jul 2023	Updated topic - What's new	Export limit on search results extended to 30,000 from 10,000. Learn more.
11 Jul 2023	Updated topic - What's new	Image refresh option. Learn more.
10 Jul 2023	Updated topic - What's new	Failed Machines alert. Learn more.
29 Jun 2023	Updated topic - What's new	Support for getting custom properties from the machine profile input in GCP. Learn more.
29 Jun 2023	Updated topic - What's new	Remove tags in AWS environments. Learn more.
29 Jun 2023	Updated topic - What's new	Ability to get historical errors and warnings associated with an MCS machine catalog. Learn more.
29 Jun 2023	Updated topic - What's new	Increased capacity with improved performance for Citrix in Google Cloud. Learn more.
29 Jun 2023	Updated topic - What's new	Ability to reset the OS disk of a persistent VM in an MCS created machine catalog in Google Cloud and AWS environment. Learn more.

Date	Change	Description
29 Jun 2023	Updated topic - What's new	Support for changing disk related custom properties of an existing catalog and existing VMs in GCP. Learn more.
26 Jun 2023	Added a new section to the Upgrade VDAs article	Upgrade VDAs using PowerShell. Learn more.
14 Jun 2023	Updated topic - What's new	Dynamic session timeout support extended to VDA version 2203 LTSR CU3 or later. Learn more.
14 Jun 2023	Updated topic - What's new	Improved host connection creation experience in Full Configuration. Learn more.
13 Jun 2023	Updated topic - What's new	Additional component selection in VDA upgrade. Learn more.
13 Jun 2023	Updated topic - What's new	Full Configuration now preconfigures certain settings for Azure machines based on machine profiles. Learn more.
13 Jun 2023	Updated topic - What's new	Support for AWS instance hibernation. Learn more.
13 Jun 2023	Updated topic - What's new	Support for optimizing AWS throttling. Learn more.
12 Jun 2023	Updated topic - What's new	Secure environment for Azure managed traffic. Learn more.
09 Jun 2023	Updated topic - What's new	Support for provisioning catalog VMs with Azure Monitor Agent. Learn more.
07 Jun 2023	Updated topic - What's new	Enable restart schedule for an MCS catalog. Learn more.
29 May 2023	Updated topic - What's new	Search enhancements. Learn more.
19 May 2023	Updated topic - What's new	User exclusions policy for user personalization layer. Learn more.
18 May 2023	Updated topic - What's new	User experience improvements for the Policies node. Learn more.
18 May 2023	Updated topic - What's new	New option to turn off forced user logoff for Autoscale. Learn more.
18 May 2023	Updated topic - What's new	Ability to restart Windows 365 Cloud PCs. Learn more.
18 May 2023	Updated topic - What's new	More session details. Learn more.
18 May 2023	Updated topic - What's new	Support for renaming Azure AD security groups for VMs. Learn more.
18 May 2023	Updated topic - What's new	Default domain selection for machine accounts. Learn more.
18 May 2023	Updated topic - What's new	Support for updating hardware version of new VMs added in an MCS machine catalog. Learn more.
18 May 2023	Updated topic - What's new	Support for filtering AWS VM instances. Learn more.
18 May 2023	Updated topic - What's new	Support for converting a non-machine profile-based machine catalog to machine profile-based machine catalog in Azure environment. Learn more.

Date	Change	Description
18 May 2023	Updated topic - What's new	Support for double encryption on managed disk in Azure environment. Learn more.
18 May 2023	Updated topic - What's new	Support for machine profile in VMware. Learn more.
18 May 2023	Updated topic - What's new	Ability to reset the OS disk of a persistent VM in an MCS created machine catalog in Azure and Citrix Hypervisor. Learn more.
18 May 2023	Updated topic - What's new	Improved host connection creation experience. Learn more.
17 May 2023	Updated topic - Optimization for Microsoft Teams	Updated the article to align with CVAD article. Learn more.
16 May 2023	Updated topic - What's new	Ability to display the Azure AD assigned security groups for VMs to join. Learn more.
10 May 2023	Updated topic - What's new	Support for changing networks for connections. Learn more.
10 May 2023	Updated topic - VDA upgrade known issue	Issue on upgrading LTSR VDAs to LTSR CU versions. Learn more.
04 May 2023	Updated topic - What's new	Ability to remove tags in Azure environments. Learn more.
28 Apr 2023	Updated topic - What's new	Added details for cloud platforms when publishing with PVS in Image Portability Service. Learn more.
20 Apr 2023	Updated topic - What's new	Support for identifying why a machine is in maintenance mode. Learn more.
20 Apr 2023	Updated topic - What's new	Use variables to notify users of remaining time before they are logged off. Learn more.
18 Apr 2023	Updated platform versions to support new functions	See Feature matrix and version support.
14 Apr 2023	Updated topic - What's new	Support for customizing power on behavior at storage type change failure. Learn more.
14 Apr 2023	Updated topic - What's new	Support for MAK activation. Learn more.
14 Apr 2023	Updated topic - What's new	Support for Azure disk encryption at host. Learn more.
14 Apr 2023	Updated topic - What's new	Support for GCP instance template as an input for machine profile. Learn more.
14 Apr 2023	Updated topic - What's new	Support for modifying Azure AD dynamic security group name. Learn more.
14 Apr 2023	Updated topic - What's new	Added permissions required in GCP. Learn more.
14 Apr 2023	Updated topic - What's new	Credential handling. Learn more.
31 Mar 2023	Updated topic - What's new	Support for more flexible pairing of roles and scopes for custom access administrators. Learn more.
23 Mar 2023	Updated topic - What's new	Support for creating dynamic security group under existing assigned security group. Learn more.

Date	Change	Description
23 Mar 2023	Updated topic - What's new	Support for Azure AD dynamic security group for Azure AD joined VM. Learn more.
20 Mar 2023	Updated topic - What's new	Support for changing the storage type of existing VMs to a lower tier on shutdown in Azure environments. Learn more.
20 Mar 2023	Updated topic - What's new	Support for allowing security identifiers while creating virtual machines. Learn more.
20 Mar 2023	Updated topic - What's new	Ability to get warnings associated with MCS catalogs. Learn more.
13 Mar 2023	Updated topic - What's new	Shared tenants for connections. Learn more.
02 Mar 2023	Updated topic - System Requirements	Removed support for Windows 7 and Windows Server 2012 R2 on VDA 7.15. Learn more.
01 Mar 2023	Updated topic - What's new	Removed support for changing the OS type for Azure catalogs. Learn more.
27 Feb 2023	Updated topic - What's new	Support for sharing images across different Azure tenants. Learn more.
24 Feb 2023	Updated topic - What's new	Policy modeling improvements. Learn more.
24 Feb 2023	Updated topic - What's new	Ability to turn preview features on or off. Learn more.
21 Feb 2023	Updated topic - What's new	Deploy secure web and SaaS apps with Secure Private Access. Learn more.
21 Feb 2023	Updated topic - What's new	Filter log content for a specific time duration. Learn more.
21 Feb 2023	Updated topic - What's new	Updates for Autoscale. Learn more.
09 Feb 2023	Updated topic - What's new	App protection policies. Learn more.
08 Feb 2023	Updated topic - What's new	Support for scheduling configuration updates in Azure. Learn more.
08 Feb 2023	Updated topic - What's new	Support for using Citrix ready images directly from Google Cloud Marketplace. Learn more.
08 Feb 2023	Updated topic - What's new	Limit host groups scope in SCVMM Host Connection. Learn more.
08 Feb 2023	Updated topic - What's new	Real-time GPU Utilization available for AMD GPUs. Learn more.
01 Feb 2023	Updated topic - What's new	Support for zone-redundant storage in Azure. Learn more.
20 Jan 2023	Updated topic - What's new	Option to downgrade storage disk to Standard HDD when VMs shut down. Learn more.
20 Jan 2023	Updated topic - What's new	Support for configuring session roaming in Full Configuration. Learn more.
20 Jan 2023	Updated topic - What's new	Renamed some actions to better align with their actual meanings. Learn more.
18 Jan 2023	Updated topic - What's new	Support for organizing application groups using folders. Learn more.

Date	Change	Description
12 Jan 2023	Updated topic - What's new	Restriction enhancements for delivery groups. **Learn more**.
09 Jan 2023	Updated topic - What's new	Access Citrix Analytics for Performance - Session Details from Monitor. **Learn more**.
02 Jan 2023	Updated topic - What's new	Non-persistent VMs are deleted from hypervisors or cloud services when you delete them or their machine catalogs in Full Configuration. **Learn more**.
20 Dec 2022	Updated topic - What's new	Support for creating Azure AD joined, Hybrid Azure AD joined, and Microsoft Intune enabled catalogs with Azure AD joined master VMs. **Learn more**.
14 Dec 2022	Reorganized topics	Reorganized topics under Plan and build a deployment section.
06 Dec 2022	Updated topic - What's new	Support in MCS for deleting VM objects without accessing the hypervisor. **Learn more**.
05 Dec 2022	Updated topic - Migrate workloads to public cloud	Added support for AWS. **Learn more**.
29 Nov 2022	Removed topic - What's new	Support for delivering MSIX and MSIX app attach apps. **Learn more**.
18 Nov 2022	Removed topic - What's new	Access Citrix Analytics for Performance - Session Details from Monitor.
16 Nov 2022	Updated topic - What's new	Prompt for unsupported VDA versions and functional levels. **Learn more**.
16 Nov 2022	Updated topic - What's new	Ability to annotate master images extended to catalog creation. **Learn more**.
16 Nov 2022	Updated topic - What's new	Support for exporting desktop assignment data through Full Configuration. **Learn more**.
16 Nov 2022	Updated topic - What's new	All Applications and Application Folders tabs consolidated into one. **Learn more**.
15 Nov 2022	Updated article	Updated Autoscale articles to provide a get-started walkthrough. **Learn more**.
09 Nov 2022	Updated topic - What's new	Support for changing the storage type to a lower tier when a VM is shut down in Azure environments. **Learn more**.
07 Nov 2022	Updated topic - Migrate workloads to public cloud	IPS 1.2.4 release - added support for newer PVS and VDA versions. **Learn more**.
02 Nov 2022	Updated topic - What's new	Access Citrix Analytics for Performance - Session Details from Monitor. **Learn more**.
02 Nov 2022	Updated topic - What's new	Updates in Filters View. **Learn more**.
19 Oct 2022	Updated topic - Scale and size considerations for Cloud Connectors	Updated with new tested values and recommendations. **Learn more**.
13 Oct 2022	Updated topic - What's new	Support for using machine profiles and host groups at the same time. **Learn more**.
11 Oct 2022	Updated topic - What's new	Support for organizing delivery groups using folders. **Learn more**.
08 Oct 2022	Updated topic - What's new	Support for scheduling a one-time restart for machines through Full Configuration. **Learn more**.

Date	Change	Description
03 Oct 2022	Updated topic - What's new	Advanced Probe Scheduling. Learn more.
29 Sep 2022	Updated topic - What's new	Older versions of the Remote PowerShell SDK are now deprecated. Learn more.
29 Sep 2022	Updated topic - What's new	Machine catalogs with Trusted launch. Learn more.
29 Sep 2022	Updated topic - What's new	Support for identifying Microsoft System Center Virtual Machine Manager resources created by MCS. Learn more.
29 Sep 2022	Updated topic - What's new	Support for identifying VMware resources created by MCS. Learn more.
29 Sep 2022	Updated topic - What's new	Support for optimizing AWS Workspace throttling. Learn more.
21 Sep 2022	Updated topic - What's new	Ability to check machine details when viewing machine counts in Home. Learn more.
21 Sep 2022	Updated topic - What's new	Support for machine catalog creation using an image from a different subscription in the same Azure tenant. Learn more.
30 Aug 2022	Updated topic - What's new	Support for identifying Citrix hypervisor resources created by MCS. Learn more.
30 Aug 2022	Updated topic - What's new	Support for using host groups and Azure availability zones at the same time. Learn more.
22 Aug 2022	Updated topic - What's new	Support for updating the folder ID of a machine catalog in VMware. Learn more.
19 Aug 2022	Updated topic - What's new	Time zone setup. Learn more.
17 Aug 2022	Updated topic - What's new	AWS support for Image Portability Service. Learn more.
12 Aug 2022	Updated topic - What's new	Page file setting during image preparation in Azure environments. Learn more.
12 Aug 2022	Updated topic - What's new	Support for updating page file setting in Azure environments. Learn more.
08 Aug 2022	Updated topic - What's new	Updates to the Home page. Learn more.
05 Aug 2022	Updated topic - Feature Version Matrix	Removed feature, Key RTOP Data Display due to EOL
04 Aug 2022	Updated topic - What's new	Support for enabling Azure VM extensions. Learn more.
04 Aug 2022	Updated topic - What's new	Trusted launch support for ephemeral OS disk. Learn more.
25 Jul 2022	Updated topic - Create machine catalogs	Volume licensing activation. Learn more.
19 Jul 2022	Updated topic - What's new	Dynamic session timeouts for single-session OS machines. Learn more.
18 Jul 2022	Updated topic - What's new	Send logoff reminders without forcing user logoff in Autoscale. Learn more.
18 Jul 2022	Updated topic - What's new	Ability to set the Linux OS license type when creating Linux VM catalogs in Azure. Learn more.

Date	Change	Description
18 Jul 2022	Updated topic - What's new	Enhanced search experience in Full Configuration. **Learn more**.
15 Jul 2022	Updated topic - What's new	Support for VMware Storage Profiles. **Learn more**.
15 Jul 2022	Updated topic - What's new	Support for RestrictedKrbHost SPN registration. **Learn more**.
14 Jul 2022	Updated topic - What's new	App Packages in Full Configuration for delivering Microsoft packaged applications. **Learn more**.
07 Jul 2022	Updated topic - What's new	Support for using ARM template specs as machine profiles. **Learn more**.
07 Jul 2022	Updated topic - What's new	Support for validating ARM template spec. **Learn more**.
30 Jun 2022	Added a new section to the Manage machine catalogs article	Use PowerShell to check VDA upgrade status and VDA version. **Learn more**.
24 Jun 2022	Updated topic - What's new	Support for Azure Resource Manager (ARM) template specs when using machine profiles. **Learn more**.
17 Jun 2022	Updated topic - What's new	Restart schedule support for single-session OS machines. **Learn more**.
17 Jun 2022	Updated topic - What's new	Option to perform user name pre-checks. **Learn more**.
16 Jun 2022	Updated topic - What's new	Support for SCVMM 2022. **Learn more**.
16 Jun 2022	Updated topic - What's new	Support for configuring maximum concurrent provisioning operations parameter on AWS. **Learn more**.
16 Jun 2022	Updated topic - What's new	Ability to change the network setting for an existing provisioning scheme. **Learn more**.
16 Jun 2022	Updated topic - What's new	Retrieve region name information for Azure VMs, managed disks, snapshots, Azure VHD, and ARM template. **Learn more**.
16 Jun 2022	Updated topic - Deprecation	Use of unmanaged disk to provision VM in Azure environments. **Learn more**.
16 Jun 2022	Updated topic - What's new	Ability to use machine profile property values in Azure environment. **Learn more**.
16 Jun 2022	Updated topic - What's new	Extended support for VDA upgrade. **Learn more**.
15 Jun 2022	Updated topic - What's new, Application and Desktop Probing in Monitor	Citrix Probe Agent now available in Citrix Cloud Japan and Citrix Cloud Government Control Planes. **Learn more**.
10 Jun 2022	Updated topic - What's new	Customize the port used for communication between VDAs and Cloud Connectors. **Learn more**.
09 Jun 2022	Updated topic - What's new	Ssupport for organizing machine catalogs using folders. **Learn more**.
31 May 2022	Updated topic - What's new	Enhanced Session launch diagnostics. **Learn more**.
25 May 2022	Updated topic - Non-domain-joined	Removed FAS limitation. **Learn more**.

Date	Change	Description
17 May 2022	Updated topic - Sign up for Citrix DaaS	Ordering Citirx DaaS through Google Cloud Marketplace. Learn more.
17 May 2022	Updated topic - What's new	Support for Azure Stack HCI provisioning through SCVMM. Learn more.
17 May 2022	Updated topic - What's new	Support for identifying all Azure resources created by MCS. Learn more.
17 May 2022	Updated topic - What's new	Support for Set-ProvServiceConfigurationData in Remote PowerShell SDK. Learn more.
17 May 2022	Updated topic - What's new	Ability to set the Linux license type when creating Linux machine catalogs using PoSH command. Learn more.
17 May 2022	Updated topic - What's new	Support for adding non-Active Directory users manually. Learn more.
17 May 2022	Added a new section to the Upgrade article	Upgrade VDAs using the Full Configuration interface. Learn more.
02 May 2022	Name change	Changed Citrix Virtual Apps and Desktops to Citrix DaaS to align with updates made to the product UI.
29 Apr 2022	Updated topic - What's new	Home page for the Full Configuration interface. Learn more.
28 Apr 2022	Updated topic - What's new	Show the progress of catalog creation and updates. Learn more.
27 Apr 2022	Updated topic - What's new	Display available hypervisors and cloud services based on the selected zone. Learn more.
27 Apr 2022	Updated topic - What's new	Support for non-on-premises-AD-joined users in Full Configuration. Learn more.
26 Apr 2022	Updated topic - What's new	Ability to reject invalid custom properties in Google Cloud Platform (GCP) and Azure environments. Learn more.
25 Apr 2022	Updated topic - What's new	Support for creating Azure Active Directory joined machines (preview). Learn more.
25 Apr 2022	Updated topic - What's new	Support for creating hybrid Azure Active Directory joined machines. Learn more.
25 Apr 2022	Updated topic - What's new	Azure trusted launch support for snapshots. Learn more.
25 Apr 2022	Updated topic - What's new	Export machines. Learn more.
21 Apr 2022	Updated topic - What's new	Option to access Workspace Environment Management web console. Learn more.
19 Apr 2022	Updated topic - What's new	Ability to manage ProvScheme parameters. Learn more.
13 Apr 2022	Updated topic - What's new	Support for restarting non-power managed machines after draining all sessions. Learn more.
07 Apr 2022	Updated topic - What's new	Support for upgrading VDA machines (preview). Learn more.
06 Apr 2022	Updated topic - What's new	Machines are not shut down during outages. Learn more.

Date	Change	Description
01 Apr 2022	Updated topic - What's new	Option to access the Session Recording service. **Learn more**.
01 Apr 2022	Updated topic - What's new	Rebranded Citrix Virtual Apps and Desktops service. **Learn more**.
01 Apr 2022	Updated topic - What's new	Tenant support in Full Configuration. **Learn more**.
01 Apr 2022	Updated topic - What's new	Updates for Autoscale. **Learn more**.
01 Apr 2022	Updated topic - What's new	License validity checks. **Learn more**.
01 Apr 2022	Updated topic - What's new	Blade style applied to the Machine Catalogs and Policies nodes. **Learn more**.
01 Apr 2022	Updated topic - AWS cloud environments	About AWS permissions. **Learn more**.
01 Apr 2022	Updated topic - What's new	Support for updating MCS provisioned machines in Azure environments. **Learn more**.
11 Mar 2022	Updated topic - What's new	Citrix Virtual Apps and Desktops for Google Cloud available on Google Cloud Marketplace. **Learn more**.
07 Mar 2022	Updated topic - What's new	Azure trusted launch support. **Learn more**.
03 Mar 2022	Updated topic - Migrate workloads to public cloud	Image Portability Service released. **Learn more**.
03 Mar 2022	Updated topic - What's new	Azure permissions. **Learn more**.
28 Feb 2022	Updated topic - What's new	Support for using VM's temporary disk to host the write-back cache disk in Azure environments. **Learn more**.
25 Feb 2022	Updated topic - What's new	Updates to AWS host connection default settings. **Learn more**.
24 Feb 2022	Updated topic - What's new	Added support for different storage tiers in GCP environments. **Learn more**.
24 Feb 2022	Updated topic - What's new	Support for changing certain VM settings after creating Azure VM catalogs. **Learn more**.
23 Feb 2022	Updated topic - What's new	Support for storing Azure ephemeral OS disk either on the cache disk or temporary disk. **Learn more**.
17 Feb 2022	Updated topic - What's new	Support for Nutanix clusters on AWS. **Learn more**.
16 Feb 2022	Updated topic - What's new	Support for VMware cloud on Amazon Web Services (AWS). **Learn more**.
11 Feb 2022	Updated topic - AWS cloud environments	In minimal IAM permissions policy, specific resource-level permissions can be added instead of full access. **Learn more**.
08 Feb 2022	Updated topic - What's new	Support for configuring write-back cache disk for machines running on GCP. **Learn more**.
31 Jan 2022	Updated topic - Identify resources created by MCS	Ability to identify GCP resources created by MCS. **Learn more**.

Date	Change	Description
31 Jan 2022	Removed topic	Removed topic on **Important consideration about setting custom properties** because GCP does not display the error message in the mentioned format.
24 Jan 2022	Updated topic - What's new	Troubleshooting VDA registration and session launch issues using Full Configuration*. Learn more.
24 Jan 2022	Updated topic - What's new	Ability to specify the Azure secret expiration date for existing connections. Learn more.
24 Jan 2022	Updated topic - What's new	A button to add administrators. Learn more.
24 Jan 2022	Updated topic - What's new	New look and feel of wizards in Full Configuration. Learn more.
17 Jan 2022	Updated topic - What's new	Support for retaining system disk when MCS I/O is enabled for machines running on Google Cloud Platform (GCP). Learn more.
17 Jan 2022	Updated topic - What's new	Support for direct upload or download from EBS on Amazon Web Services (AWS). Learn more.
11 Jan 2022	Update to system requirements	Clarified Visual C++ Runtime Redistributable versions.
06 Jan 2022	Updated topic - What's new	Ability to configure access to Manage and Monitor. Learn more.
05 Jan 2022	Updated topic - What's new	Ability to identify Amazon Web Services (AWS) resources created by MCS. Learn more.
04 Jan 2022	Updated topic - Microsoft Azure Resource Manager cloud environments	Restriction on enabling Azure ephemeral OS disk and MCS I/O at the same time. Learn more.
30 Dec 2021	Updated topic - What's new	Support for Google Cloud VMware Engine. Learn more.
17 Dec 2021	Updated topic - Microsoft Azure Resource Manager cloud environments	Added support for Azure ephemeral OS temp disk. Learn more.
15 Dec 2021	Updated topic - What's new	Ability to specify what account names start with when specifying a naming scheme. Learn more.
15 Dec 2021	Updated topic - What's new	Support for creating Nutanix AHV XI and Nutanix AHV Prism Central (PC) connections. Learn more.
09 Dec 2021	Updated topic - What's new	Support for selecting the storage type for OS disks when provisioning VMs on GCP. Learn more.
07 Dec 2021	Updated topic - What's new	Option to use Azure ephemeral OS disk. Learn more.
03 Dec 2021	Updated topic - What's new	Option to protect accidental machine deletion. Learn more.
30 Nov 2021	Updated topic - What's new	Annotating an image when updating machines. Learn more.
17 Nov 2021	Updated topic - What's new	Multi-type licensing support. Learn more.
09 Nov 2021	Updated article	Updated Limits value.
05 Nov 2021	Updated topic - What's new	Support for displaying Azure Marketplace purchase plan information. Learn more.

Date	Change	Description
28 Oct 2021	Updated topic	Added new information about managing catalogs created in Quick Deploy.
15 Oct 2021	Updated topic - What's new	Ability to update persistent MCS catalogs. Learn more.
15 Oct 2021	Updated topic - What's new	Option to provision VMs on an Azure dedicated host. Learn more.
14 Oct 2021	Updated topic - What's new	Preserving a provisioned virtual machine when power cycling. Learn more.
13 Oct 2021	PowerShell version support	Added PowerShell version support information.
08 Oct 2021	Updated topic - What's new	Binding a machine catalog to a Workspace Environment Management configuration set. Learn more.
29 Sep 2021	Updated topic - What's new	Enhancement for adding informative descriptions about changes related to machine catalog image updates. Learn more.
29 Sep 2021	Updated topic - What's new	Added support for Azure VMware Solution. Learn more.
29 Sep 2021	Updated topic - What's new	Use the same resource group for multiple catalogs. Learn more.
28 Sep 2021	Updated topic - What's new	Retrieve information for Azure VMs. Learn more.
28 Sep 2021	Updated topic	Update for Automated Configuration. Learn more.
24 Sep 2021	Updated topic - What's new	More scheduling options available with restart schedules. Learn more.
23 Sep 2021	Updated topic - What's new	Support preserving custom columns that degrade performance. Learn more.
09 Sep 2021	Updated topic - What's new	Added support for non-domain-joined catalogs. Learn more.
08 Sep 2021	Correction	Noted Browser Content Redirection automatic installation for VDAWorkstationCoreSetup.exe installer (minimum VDA version 2003).
08 Sep 2021	Updated topic	Added links to videos about Local Host Cache.
06 Sep 2021	Updated topic - What's new	Added a feature to the **Manage > Full Configuration** interface. Learn more.
01 Sep 2021	Updated topic	Added support for Windows Server 2022. Learn more.
30 Aug 2021	Updated topic - What's new	Added a feature to the **Manage > Full Configuration** interface. Learn more.
26 Aug 2021	Updated article	Add ICA security information.
23 Aug 2021	Updated topic - What's new	Additional storage types for virtual machines in Azure environments. Learn more.
23 Aug 2021	Updated topic - What's new	Added a feature to the **Manage > Full Configuration** interface. Learn more.
13 Aug 2021	Updated topic - What's new	Added features to the **Manage > Full Configuration** interface. Learn more.

Date	Change	Description
11 Aug 2021	Updated article	Added instructions for changing root password in image created from Ubuntu prepared image when using Quick Deploy.
30 Jul 2021	Updated article - What's new	Added a feature to the **Manage > Full Configuration** interface. Learn more.
28 Jul 2021	Updated article	Updated Limits value.
21 Jul 2021	New articles	Added task articles under Quick Deploy.
21 Jul 2021	New article	Added Technical security overview for Citrix Managed Azure.
21 Jul 2021	Updated article	Updated instructions on how to change URL types for Host to client redirection.
20 Jul 2021	Updated topic - What's new	Added a feature to the **Manage > Full Configuration** interface. Learn more.
20 Jul 2021	Updated topic	Updated Limits value.
14 Jul 2021	Updated topic	Updated Limits values.
13 Jul 2021	Updated topic - What's new	Support Customer Managed Encryption Keys (CMEK) on Google Cloud Platform (GCP). Learn more.
08 Jul 2021	Updated topic	Added information about application IDs and client secrets. See Authenticate to Azure to create a service principal.
07 Jul 2021	Correction	Updated PowerShell option name for allowing session reconnection when disconnected in maintenance mode.
06 Jul 2021	Updated topic - What's new	Updates to the Manage tab. Learn more.
06 Jul 2021	Updated topic	Announced deprecation of the legacy console. See Deprecation.
05 Jul 2021	Updated topic - What's new	Added a feature for Web Studio. Learn more.
29 Jun 2021	Updated topic - What's new	Enhancement for adding Azure Shared Image Gallery image version as master image source. Learn more.
23 Jun 2021	Updated topic - What's new	Support shielded virtual machines on Google Cloud Platform (GCP). Learn more.
22 Jun 2021	Updated topic	Updates for 2106 VDA.
22 Jun 2021	Updated topic	Use registry settings to enforce HTTPS or HTTP traffic.
16 Jun 2021	Name change	Changed Windows Virtual Desktop to Azure Virtual Desktop.
10 Jun 2021	Article title change	Changed **Install and configure** to **Plan and build a deployment**.
09 Jun 2021	Updated topic - What's new	Added Azure standard SSD support for an identity disk to reduce cost. Learn more.
09 Jun 2021	Removed topic	Removed Azure Quick Deploy topic.

Date	Change	Description
07 Jun 2021	Updated topic – What's new	Added features for Web Studio. Learn more.
28 May 2021	Added a new section to the Optimization for Microsoft Teams article	For details, see Proxy servers
27 May 2021	Updated topic	Added link to service's Lifecycle policy.
25 May 2021	Updated topic – What's new	Added enhancement to session reconnection. Learn more.
18 May 2021	Correction	When installing or upgrading a VDA, configure MCS IO on the **Additional Components** page (instead of **Features**). From the command line, use `/includeadditional "Citrix MCS IODriver"` or `/exclude "Citrix MCS IODriver"` (instead of `/install_mcsio_driver`).
18 May 2021	Updated topic – What's new	Added a feature for Web Studio. Learn more.
17 May 2021	Updated topic – What's new	Added support for Azure ephemeral disk. Learn more
17 May 2021	Updated topic – What's new	Updated Azure values for the maximum number of simultaneous actions. Learn more.
06 May 2021	Added topic	FIDO2 redirection. Learn more.
30 Apr 2021	Updated topic	Features unavailable during an outage updated.
28 Apr 2021	Updated topic – What's new	Added a feature for retrieving dynamic instances using AWS API. Learn more.
28 Apr 2021	Updated topic – What's new	Added a feature for Web Studio. Learn more.
27 Apr 2021	Updated topic – What's new	Added a feature for MCS I/O support for Azure VMs without temporary storage. Learn more.
27 Apr 2021	Updated topics	During VDA installation, specifying the Citrix WEM Agent uses the option "Citrix WEM Agent" (not "Workspace Environment Management").
27 Apr 2021	Updated topic – What's new	Added a feature for Web Studio. Learn more.
26 Apr 2021	Updated topic	Update for Automated Configuration. Learn more.
22 Apr 2021	Updated topic	Updated Limits values.
09 Apr 2021	Updated topic – What's new	Added feature for preserving GCP instances across power cycles. Learn more.
09 Apr 2021	Updated topic – What's new	Support for Azure Gen2 images. Learn more.
09 Apr 2021	Updated topic – What's new	Added feature for disabling table storage accounts. Learn more.
09 Apr 2021	Updated topic – What's new	Added feature for eliminating locks in storage accounts. Learn more.
08 Apr 2021	Updated topic – What's new	Added features for Web Studio. Learn more.
31 Mar 2021	Updated topic – What's new	Support for Azure dedicated hosts Learn more values.

Date	Change	Description
30 Mar 2021	Updated topic - What's new	Support for Azure server side encryption. Learn more.
29 Mar 2021	Updated topic - Limits	Increased VDAs per Google Cloud Platform project. See Machine Creation Services (MCS) limits
26 Mar 2021	Updated topic - What's new	Provision machines into specified availability zones on Azure. Learn more.
19 Mar 2021	Updated topic - What's new	Added features for Web Studio. Learn more.
04 Mar 2021	Updated topic	Added information about Citrix Optimizer for Windows VDAs
03 Mar 2021	Updated topic - What's new	Azure Shared Image Gallery. Learn more.
03 Mar 2021	Updated topic - What's new	Storage buckets created in same Google Cloud Platform region. Learn more.
25 Feb 2021	Updated topic - What's new	Machine restart schedules. Learn more.
25 Feb 2021	Updated topic - What's new	Added features for Web Studio. Learn more.
24 Feb 2021	Updated topic	New information about Citrix Managed Azure.
26 Jan 2021	Updated topic	Updated Limits values.
21 Jan 2021	Updated topic	A new PowerShell command option (`-DefaultReuseMachinesWithoutShutdownInOutage`) extends reuse of desktop VDAs in pooled delivery groups during an outage by default. See Application and desktop support.
21 Jan 2021	Updated topic - What's new	Google Cloud Platform on-demand provisioning. Learn more.
20 Jan 2021	Updated topic - What's new	Added features for Web Studio. Learn more.
17 Dec 2020	Updated topic - What's new	Web Studio available as a preview. Learn more.
17 Nov 2020	RDS license server information	Added information about Microsoft RDS License Servers for Windows Server workloads.
30 Sep 2020	Updated topic	Added concurrent Director session administrators limit.
22 Sep 2020	New article	The new Quick Deploy feature replaces the earlier Azure Quick Deploy.
17 Sep 2020	Updated topic - What's new	Security key to authenticate StoreFront and Citrix Gateway and Session Administrator (built-in role). Learn more.
03 Sep 2020	Updated topic - What's new	Support for VMware vSphere 7.0 and Microsoft System Center Virtual Machine Manager 2019, use direct upload when creating managed disks in Azure, added support for NV4as_v4 machine types, updates to the narrow scoped service principal for Azure managed disks. Learn more.
31 Aug 2020	Updated topic	Limited access to the Remote PowerShell SDK during an outage. See What is unavailable during an outage.

Date	Change	Description
19 Aug 2020	Updated topic - What's new	Shared VPC support and zone selection support for Google Cloud Platform. Learn more.
14 Aug 2020	Added new article	Added the Double hop in Citrix Virtual Apps and Desktops article. For more information, see Double hop in Citrix Virtual Apps and Desktops.
27 Jul 2020	Updated topic - What's new	Power-off delay support for assigned VDI machines (PowerShell only) and support for granular, role-based access to the Filters page. Learn more.
24 Jul 2020	Updated topic	Removed unsupported `/hdxflashv2only` VDA install command option.
24 Jul 2020	Updated topics	Add information about XML trust. Can now use `Set-BrokerSite`.
23 Jul 2020	Updated topic	Updated Limits.
10 Jul 2020	Article added to TOC	Retitled StoreFront article to User access and updated.
10 Jul 2020	Updated topic - What's new	Support for Windows Client licenses. Learn more.
19 Jun 2020	Added topic	Added User personalization layer topic.
28 May 2020	Updated topic	Updated discovery module for App-V packages and servers.
21 May 2020	Updated topic	Updated MCS limit for maximum VDAs per Azure subscription.
21 May 2020	Updated topic	Can indicate whether a machine restart schedule affects machines in maintenance mode (PowerShell only).
07 May 2020	Updated Local Host Cache topic	StoreFront feature for resource availability during outage. Learn more.
10 Apr 2020	Updated topic - What's new	Autoscale - Enhanced scheduling granularity for VDI Delivery Groups and EDT MTU Discovery. Learn more.
09 Apr 2020	Added several topics	Added several topics that were just links. See HDX, Devices, Graphics, Multimedia, General content redirection and the subtopics. See Citrix ICA virtual channels, Virtual IP and virtual loopback, and [Sessions].
04 Apr 2020	Updated topic - What's new	Information about AWS instance property capturing and operational resource tagging Learn more.
26 Mar 2020	Add article about limits	Add article about resource limits.
04 Mar 2020	New topic	Added Licenses article, containing links to license usage information.
15 Jan 2020	Updated topic - What's new	Added warning about upgrading VDAs that have the Personal vDisk (PvD) component installed. Learn more.
10 Jan 2020	Updated topic - What's new	Language bar added to Citrix Studio. Learn more.
03 Jan 2020	Updated topic - What's new	Support for restart schedule maximum delay timer (PowerShell only). Learn more.

Date	Change	Description
02 Jan 2020	Updated topic - What's new	Support for vertical load balancing (PowerShell only). Learn more.
19 Dec 2019	Updated topic - What's new	Support for Citrix Service Providers to onboard tenant customers and provide access to apps and desktops through shared or dedicated workspaces. Learn more.
06 Dec 2019	Updated topic - What's new	Support for determining why a machine is in maintenance mode (PowerShell only). Learn more.
02 Dec 2019	Updated topic - What's new	Autoscale - Dynamically provision machines with Autoscale. Learn more.
19 Nov 2019	Updated topic - What's new	GroomStartHour support. Learn more.
06 Nov 2019	Updated topic - What's new	OData Pagination support. Learn more.
23 Oct 2019	Updated topic - What's new	App-V functionality added to Citrix Cloud. Learn more.
14 Oct 2019	Updated topic - What's new	Support for using Machine Creation Services (MCS) to provision machines on the Google Cloud Platform (GCP). Learn more.
30 Sep 2019	Updated topic - What's new	VDA support for Windows Virtual Desktop. Learn more.
18 Sep 2019	Updated topic - What's new	Tags on machine catalogs. Learn more.
16 Sep 2019	Updated topic - What's new	Session startup duration in Monitor displays. Learn more.
22 Aug 2019	Updated topic - What's new	Enhancements to Monitor session information displays. Learn more.
02 Jul 2019	Updated topic - What's new	Added the new feature - Operating System name changes. Learn more.
01 Jul 2019	Setup of Document History article	Setup of the Document History article for the Citrix Virtual Apps and Desktops service.
