

# Configuring Dashlane

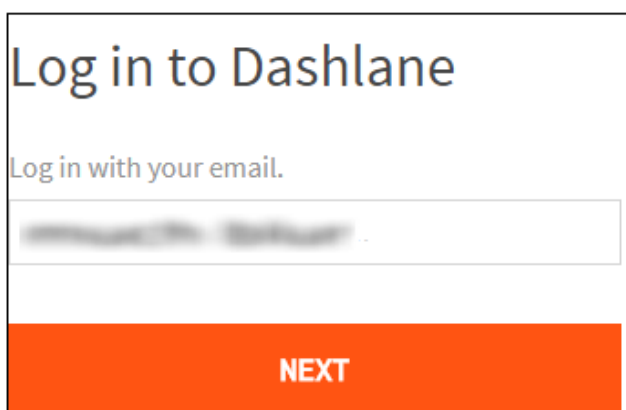

Configuring Dashlane for single sign-on (SSO) enables administrators to manage users of Citrix ADC. Users can securely log on to Dashlane by using the enterprise credentials.

## Prerequisite

Browser Requirements: Internet Explorer 11 and above

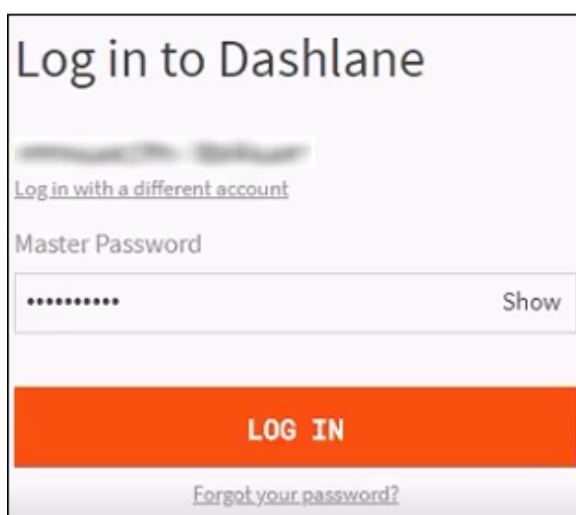

## To configure Dashlane for SSO by using SAML:

1. In a browser, type <https://console.dashlane.com> and press **Enter**.
2. Type your Dashlane admin credentials in **Log in with your Email** and click **NEXT**.

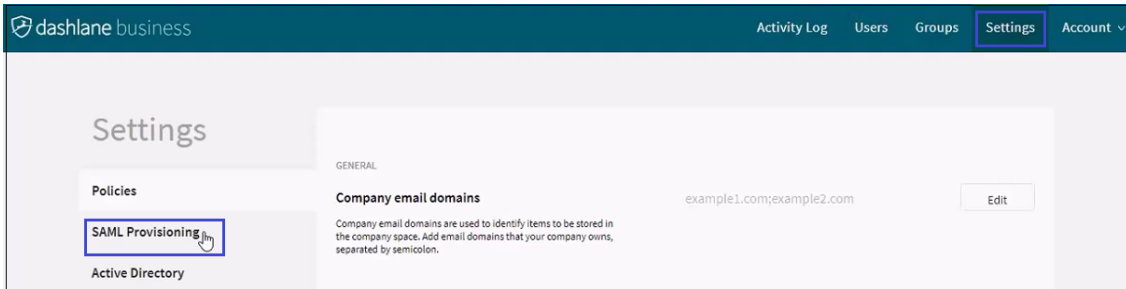

The screenshot shows the Dashlane login interface. At the top, it says "Log in to Dashlane". Below that, it prompts "Log in with your email." There is a text input field containing a blurred email address. At the bottom of the form is a large orange button labeled "NEXT".

3. Type your Dashlane **Master Password** and click **LOG IN**.

The screenshot shows the Dashlane login interface. At the top, it says "Log in to Dashlane". Below that, there is a blurred email address and a link that says "Log in with a different account". The main prompt is "Master Password". There is a text input field containing several dots, and a "Show" button to its right. At the bottom of the form is a large orange button labeled "LOG IN". Below the button is a link that says "Forgot your password?".

- In the user profile menu that is present at the top-right corner of the screen, click **Settings**.
- Under **Settings**, click **SAML Provisioning**.

- To create SSO, click **Edit** and enter the values in the following fields:

Field	Description
Idp Entity ID	IdP logon URL (optional)
Public certificate	Copy and paste the IdP certificate. The IdP certificate must begin and end with -----Begin Certificate----- and -----End Certificate----- <b>Note:</b> The IdP certificate is provided by Citrix and can be accessed from the link below: <a href="https://ssb4.mgmt.netscalergatewaydev.net/idp/saml/templatetest/idp_metadata.xml">https://ssb4.mgmt.netscalergatewaydev.net/idp/saml/templatetest/idp_metadata.xml</a>

- Finally, click **Save**.
