

Configure Room Booking System for Single Sign-On

Configuring Room Booking System for single sign-on (SSO) enables administrators to manage users of Citrix ADC. Users can securely log on to Room Booking System by using the enterprise credentials.

Prerequisite

Browser Requirements: Internet Explorer 11 and above

To configure Room Booking System for SSO by using SAML:

1. In a browser, type https://<customer_domain>.roombookingsystem.co.uk/adminlogin and press **Enter**.
2. Type your Room Booking System admin account credentials (**Username** and **Password**) and click **Login**.

The screenshot shows the Wipro Room Booking System Administrator Login page. The page has a blue header with the Wipro logo. Below the header, the title "Administrator Login" is displayed in blue. To the right of the title, there is a "User Login" link with a user icon. The form contains two input fields: "Username" and "Password". The "Username" field is a light blue box with a blurred input. The "Password" field is a yellow box with a blurred input. Below the password field, there is a checkbox labeled "Remember My Password". At the bottom of the form, there is a "Login" button with a key icon. A link "Forgot your login?" is located at the bottom left of the form.

3. In the dashboard page, click **Settings**.

4. Click **Authentication**.

5. Click the **SAML/ADFS Single Sign-on** radio button.

6. Select the **SAML Enabled, Enable SP Initiated Login, Automatically Create New Users, and Update User Department Upon Login** check boxes.

7. Select the **Metadata URL (auto-refresh)** radio button and enter the values for the following fields:

| Required Information | Description |
|----------------------|---|
| Metadata URL | The IdP metadata is provided by Citrix and can be accessed from the link below. The link is displayed while configuring SSO settings for your app. <a href="https://gateway.cloud.com/idp/saml/<citrixcloudcust_id>/<app_id>/idp_metadata.xml">https://gateway.cloud.com/idp/saml/<citrixcloudcust_id>/<app_id>/idp_metadata.xml |
| Entity ID | Entity ID |

Configure using Metadata URL (auto-refresh) Metadata File (manual refresh)

Metadata URL

e.g. <https://adfs.domain.co.uk/FederationMetadata/2007-06/FederationMetadata.xml>

Entity ID

e.g. <http://adfs.domain.co.uk/adfs/services/trust>

8. Finally, click **Update**.
