Non-Commercial Software Disclosures
For FlexNet Publisher 2016 R1 (11.14.0.0)
29-July-2016
Introduction
The document section lists FlexNet Publisher’s use of all non-commercial software (NCS) that meets these criteria:

- The product needs the NCS in order to operate
- The NCS is not included with the runtime environment supported by the product; and
- The NCS was written by someone other than a Flexera employee or paid contractor

Non-commercial software (NCS) can be either open source software (OSS) or no-cost closed source software.

Summary of FlexNet Publisher Components that use Non-Commercial Software

Production processes

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
<th>Distribution type</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>lmadmin</td>
<td>License server manager</td>
<td>On-premises: Enterprise</td>
<td>Not available on HP-UX and FreeBSD</td>
</tr>
<tr>
<td>imgrd</td>
<td>Legacy license server manager</td>
<td>On-premises: Enterprise</td>
<td></td>
</tr>
<tr>
<td>vendor daemon</td>
<td>License server</td>
<td>On-premises: Enterprise</td>
<td>Producer builds their own vendor daemon</td>
</tr>
<tr>
<td>lmutil (and variations)</td>
<td>General licensing utility</td>
<td>On-premises: Enterprise</td>
<td></td>
</tr>
<tr>
<td>VCG</td>
<td>Backoffice component, used in generating certificate licenses</td>
<td>Hybrid: Producer backoffice or backoffice hosted by Flexera</td>
<td></td>
</tr>
<tr>
<td>FlexNet Licensing Service</td>
<td>Component that performs certain system-level operations, such as reading hard disk serial number, or writing to anchors.</td>
<td>On-premises: Enterprise or consumer</td>
<td>Required on Windows, Linux and OS X platforms for most FNP deployments. On Windows, extracted from FNP_Act_Installer.dll</td>
</tr>
<tr>
<td>Client application</td>
<td>Producer’s application – typically checks out licenses to use application features.</td>
<td>On-premises: Enterprise or consumer</td>
<td>Imflex is an example client application provided in the kit</td>
</tr>
<tr>
<td>Activation application</td>
<td>Producer’s activation application, used to maintain license fulfillsments in trusted storage.</td>
<td>On-premises: Enterprise or consumer</td>
<td>Examples provided in the kit include appactutil, serveractutil, appcomptranutil, servercomptranutil</td>
</tr>
</tbody>
</table>
Non production processes

Distribution type for all of these processes is: On-premises: Producer’s licensing development team

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
<th>Platform notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>preptool</td>
<td>Prepping utility. Used by producers to link the activation library (libFNP) with client and activation applications.</td>
<td>All trusted storage (TS) platforms(^1)</td>
</tr>
<tr>
<td>Imstrip</td>
<td>Tool used by producers to obfuscate FNP symbols</td>
<td></td>
</tr>
<tr>
<td>tcencrypt</td>
<td>Tool used to encrypt a producer’s trusted configuration</td>
<td>All TS platforms</td>
</tr>
<tr>
<td>xmlsign</td>
<td>Signs various xml artifacts with publisher keys</td>
<td>All TS platforms</td>
</tr>
<tr>
<td>tsreset</td>
<td>Tool used in testing to reset or delete trusted storage</td>
<td>All TS platforms</td>
</tr>
</tbody>
</table>

Production libraries

Subject: RE: Request for use of code

Hello Krzystof and Ulrich,

Thanks for your prompt reply (sorry I didn’t get back to you sooner, as I was away from the office last week). We have included the following header comment section (that came with the original files) in the file containing your code.

```c
/************************************************************************************/
/* Generative Matrix Package - File "IF.h"
/*
/* Category: Helper classes
/*
/* Meta-Functions:
/* - IF
/*
/* IF provides an if-then-else metafunction which works with VC++5.0. Some
/* additional classes are needed to work around some compiler problems.
/*
/* (c) 1998
/* Krzysztof Czarnecki
/* Ulrich Eisenecker
/* Tobias Neubert
/*
/************************************************************************************/

Please let me know if you are happy with this or would like any further text added before we send this out.

Thanks for your help (and very useful code).

Subject: Re: Request for use of code

Dear Martin,

thank you for your inquiry. We agree that you use the requested template-metaprogramming functions for commercial purpose. Please include a short notice in the source files which identifies Krzysztof Czarnecki and Ulrich W. Eisenecker as authors. Please notice
that we are not responsible for using the requested template-metaprogramming functions, any damage or loss which results from their use, and that we are not liable with any other respect of their use.

Best wishes,

Krzystof & Ulrich

Subject: Request for use of code

Hi there,

My question is regarding commercial use of the code you published on your website:

http://www-ia.tu-ilmenau.de/~czarn/gmcl/download.html#source

After reading your book on Generative Programming I have started to apply some of the techniques you described in my work. I have developed a template library and my company would like to deliver this template library as part of one of our products.

My template library currently makes use of the following files from your published code

IF.h
SWITCH.h

Can you let me know if there are any restrictions to using your code - do you allow it to be included in the distribution of a commercial product in this way.

Kind regards,

Martin Gray
