

Summary

This article contains frequently asked questions about XenServer licensing.

XenServer 7.4 is available in the following editions:

- Standard
- Enterprise
- Free

The **Standard** edition is our entry-level commercial offering, with a range of features that will suit the needs of those customers who want a robust and high performing virtualization platform, but do not require the premium features offered by the Enterprise edition; while still wishing to benefit from the assurance of comprehensive Citrix Support and Maintenance.

The **Enterprise** edition is our premium offering, optimized for desktop, server and cloud workloads. In addition to the features available in the Standard edition, the Enterprise edition offers the following features:

- Automated Windows VM Driver Updates
- Automatic updating of the Management Agent
- Support for SMB storage
- Direct Inspect APIs
- Dynamic Workload Balancing
- GPU Virtualization with NVIDIA GRID and Intel GVT-g
- VMware vSphere to XenServer Conversion utilities
- Intel Secure Measured Boot (TXT)
- Export Pool Resource Data
- In-memory Read Caching
- PVS-Accelerator
- Automated Updates using XenCenter
- XenServer Live Patching
- AMD MxGPU
- Enablement for XenDesktop Tablet Mode
- Changed Block Tracking
- IGMP Snooping

Customers who have purchased XenApp or XenDesktop have an entitlement to XenServer, which includes all the features listed above.

The **Free** edition provides a reduced set of features and is not eligible for Citrix Support and Maintenance.

For more information, see the [Citrix XenServer Feature Matrix](#).

XenServer uses the same licensing process as other Citrix products, and as such requires a valid license to be installed on a License Server. You can download the License Server from [Citrix Licensing](#). XenServer (other than through the XenApp and XenDesktop licenses) is licensed on a *per-socket* basis. Allocation of licenses is managed centrally and enforced by a standalone Citrix License Server, physical or virtual, in the environment. After applying a per-socket license, XenServer will display as *Citrix XenServer Per-Socket Edition*.

Note: Mixed pools of licensed and unlicensed hosts will behave as if all hosts were unlicensed.

Unlicensed hosts are subject to restrictions. For more information, see [Other Questions](#).

Licensing a XenServer Pool

Other Questions

Licensing Steps Overview

You need the following items to license XenServer:

- A XenServer License
- A Citrix License Server
- A XenServer host
- XenCenter

The following steps provide an overview of the process:

1. Install Citrix License Server or import the Citrix License Server Virtual Appliance into a XenServer host.
2. Download a license file
3. Add the license file to the Citrix License Server
4. Using XenCenter, enter the License Server details and apply them to hosts in your resource pool

For more information about Citrix Licensing, see the [Citrix Licensing documentation](#).

Licensing XenServer

Q: Where can I purchase a XenServer License?

A: You can purchase a XenServer License from <http://citrix.com/buy>.

Q: How do I apply a XenServer License?

A: XenServer requires a License Server. After licensing XenServer, you are provided with a .LIC license key. Install this license key on either:

- a. A Windows server running the Citrix License Server software
- or

- b. The Citrix License Server Virtual Appliance.

When you assign a license to a XenServer host, XenServer contacts the specified Citrix License Server and requests a license for the specified server(s). If successful, a license is checked out and the License Manager displays information about the license the hosts are licensed under.

For instructions on applying a XenServer license to a Citrix License Server Virtual Appliance, see [CTX200159 – How to Apply a XenServer License File to Citrix License Server Virtual Appliance \(CLSVA\)](#).

Q: How many licenses do I need to license my resource pool?

A: XenServer is licensed on a *per-CPU socket* basis. For a pool to be considered licensed, all XenServer hosts in the pool must be licensed. XenServer only counts populated CPU sockets. Customers can use the Citrix License Server to view the number of available licenses displayed in the *License Administration Console Dashboard*.

Q: Will I lose my Virtual Machine (VM) if my license expires?

A: No, you will not lose any VMs or their data.

Q: What happens if I have a licensed pool and the License Server becomes unavailable?

A. If a XenServer installation has previously been licensed, the license has not expired and yet the License Server is unavailable, then customers will receive a *grace* period of 30 days at the licensing level that was applied previously.

Q: I am upgrading to XenServer 7.4 from a previous XenServer version with a per-socket license, that is, XenServer 7.1, XenServer 7.0, or XenServer 6.5 (SP1); do I have to do anything?

A: No. Customers will be able to upgrade their hosts to XenServer 7.4 Enterprise edition using the previously purchased per-socket licenses, provided Customer Success Services is valid at least until 27 Feb 2018.

Customers who have renewed their Customer Success Services subsequent to the original purchase may need to refresh the license file on the License Server to ensure it displays the Customer Success Services eligibility.

Q: I am moving from XenServer 7.3 unlicensed edition to XenServer 7.4; do I have to do anything?

A: No. Customers will be able to upgrade their or update hosts to XenServer 7.4. Please note that customers will remain ineligible for support and premium features will be inaccessible until an appropriate license is applied.

Q: I am a XenApp and XenDesktop customer upgrading from XenServer 7.3 to XenServer 7.4; do I have to do anything?

A: No. XenApp and XenDesktop customers will be able to upgrade to XenServer 7.4 seamlessly; their existing installed XenApp and XenDesktop license will grant them entitlement to XenServer without requiring any other changes.

Q: I am a Citrix Service Provider licensed for XenApp and XenDesktop; can I use this license for XenServer when I upgrade to XenServer 7.4?

A: Yes. XenServer 7.4 supports your license. With this license you can use all of the premium features provided by the Enterprise edition of XenServer. To apply this license to your pools, all hosts within the pool must first be upgraded to run XenServer 7.4.

Q: I am customer with a Citrix Cloud XenApp and XenDesktop Service subscription; am I entitled to use XenServer 7.4?

A: Yes. If you have a Citrix Cloud XenApp and XenDesktop Service subscription that enables the use of on-premises Desktops and Apps, you are entitled to use XenServer for hosting these Desktops and Apps.

Download a license through the licensing management tool. Install this license on your License Server to use on-premises XenServer with your XenApp and XenDesktop Service subscription. With this license you can use all of the same premium features as with an on-premises XenApp and XenDesktop entitlement. To apply this license to your pools, first upgrade all hosts within the pool to run XenServer 7.4.

Q: What are the constraints on the use of the XenServer Enterprise Edition advanced virtualization management capabilities delivered as part of XenApp and XenDesktop?

A: Every edition of XenApp and XenDesktop has access to XenServer Enterprise Edition advanced virtualization management features. A complete list of all features enabled by a XenApp or XenDesktop license can be found in the [XenServer Feature Matrix](#).

Use of the XenServer entitlements permits virtualization of any and all infrastructure required to deliver XenApp and XenDesktop feature components accessed exclusively by XenApp or XenDesktop licensed users or devices.

Additional infrastructure support servers, such as Microsoft domain controllers and SQL servers are also covered by this entitlement, providing they are deployed in the same Citrix XenServer resource

pool as the XenApp or XenDesktop infrastructure covered by this license, and providing those support servers are used to support the XenApp or XenDesktop infrastructure only.

The Citrix XenServer entitlement contained within the XenDesktop or XenApp license may not be used for Citrix XenServer resource pools that do not host XenDesktop or XenApp infrastructure or Virtual Deliver Agents (VDAs), or for hosting virtual machines not covered by the permissions above. Citrix XenServer must be purchased separately for these uses.

Citrix License Servers

Q: Which License Servers can I use with XenServer?

A: You can either use the Citrix License Server software version 11.14 or later (on a server running Microsoft Windows), or the Linux-based Citrix License Server virtual appliance.

Q: How do I import my license onto the Citrix License Server?

A: For information on importing a license file, see the [Licensing documentation](#) on the Citrix Product Documentation website.

- [Install licenses by using Citrix Licensing Manager](#)
- [Import license files by using the Licensing Administration Console](#)
- [Install license files by using the command line](#)

Q: Can I run the License Server on my XenServer pool?

A: Yes. You can install the Citrix License Server software on a Windows VM or import the Linux-based Citrix License Server virtual appliance. For ease of deployment, the Citrix License Server software is pre-installed on this virtual appliance, and it can run as a VM in your XenServer pool.

XenServer operates with a 'grace' license until the License Server is able to boot. This means, after you have licensed the XenServer hosts in your pool, and you reboot the host that has the Citrix License Server running on it, a grace period is applied to that host until the appliance is restarted.

Q: Can I use the Windows version of the Citrix License Server with XenServer?

A: Yes.

Q: Can I install Licenses for other Citrix products on a Citrix License Server virtual appliance, or on the Citrix License Server software installed on Windows.

A: Yes, you can license other Citrix products using the Citrix License Server virtual appliance or through the Citrix License Server software installed on Windows. For more information, see [Licensing](#) on the [Citrix Product Documentation](#) website.

Licensing a XenServer Pool

Q: How do I apply a license to all the hosts using XenCenter?

A: Follow this procedure to apply a license:

1. On the **Tools** menu, click **License Manager**.
2. Select the Pool or Hosts you would like to license, and then click **Assign License**.

3. In the **Apply License** dialog, specify the **Edition** type you want to assign to the host, and enter the hostname or IP address of the License Server

Q: Can I apply a license without using XenCenter?

A: Yes, you can use the xe CLI. Run the host-apply-edition command. For example, enter the following to license a host:

```
xe host-apply-edition edition=enterprise-per-socket|desktop-
plus|desktop|standard-per-socket\
license-server-address=<license_server_address> host-uuid=<uuid_of_host>
\
license-server-port=<license_server_port>
```

To license a pool, use the pool-apply-edition command. For example:

```
xe pool-apply-edition edition=enterprise-per-socket|desktop-
plus|desktop|standard-per-socket\
license-server-address=<license_server_address> pool-uuid=<uuid_of_pool>
\
license-server-port=<license_server_port>
```

Q: How can I discover the license status of my hosts and pools?

A: XenCenter displays the license type of a server or pool.

To see the license type of a server or pool, select that server or pool in the tree view. XenCenter displays the license status in the title bar for that server or pool, after the server or pool name.

Mixed pools of licensed and unlicensed hosts behave as if all hosts were unlicensed. In the tree view, XenCenter displays unlicensed pools with a warning triangle icon.

Other Questions

Q: How do I get a license to evaluate XenServer?

A: You do not need a license to evaluate XenServer. You can use XenServer in an unlicensed state; however, you will not have access to premium features. In addition, you will not be eligible for Citrix Support or maintenance.

You can get a trial license to try the Enterprise edition features. For more information, see [Getting started with XenServer](#).

Q: Can I use XenServer without a license?

A: If you use XenServer in an unlicensed state, you are not eligible for Citrix Support or maintenance. In addition, the following features are restricted and require a license:

- Pools of more than three hosts¹
- High Availability

¹ Existing pools that contain three or more hosts are not impacted by this restriction until you attempt to add a new host to the pool.

- Dynamic Memory Control
- Storage Motion
- Role-Based Access Control
- GPU Passthrough
- Site Recovery Manager
- Active Directory Integration
- Rolling Pool Upgrade

You can get a trial license to try XenServer. For more information, see [Getting started with XenServer](#).

About Citrix

Citrix (NASDAQ:CTXS) aims to power a world where people, organizations and things are securely connected and accessible to make the extraordinary possible. Its technology makes the world's apps and data secure and easy to access, empowering people to work anywhere and at any time. Citrix provides a complete and integrated portfolio of Workspace-as-a-Service, application delivery, virtualization, mobility, network delivery and file sharing solutions that enables IT to ensure critical systems are securely available to users via the cloud or on-premise and across any device or platform. With annual revenue in 2015 of \$3.28 billion, Citrix solutions are in use at more than 400,000 organizations and by over 100 million users globally. Learn more at www.citrix.com.
