# Preface

This section provides an overview about the information included in this guide.

## Intended Audience

The information in this guide is intended for the System Administrators.

## Document Conventions

The following table lists various conventions used in this guide.

**Table 1: Document conventions used in this guide**

<b>Convention</b>	<b>Description</b>
<b>Bold</b>	Used for names of interface elements (such as names of fields, panes, windows, menus, buttons, dialog boxes) and what the user specifically selects, clicks, presses, or types.
<b>Note</b>	Used to highlight information that is important.

# Overview

The Citrix NetScaler application delivery controller (ADC) helps to load balance, accelerate, optimize, and secure enterprise applications.

Domo provides cloud-based business management suite that integrates with multiple data sources including spreadsheets, databases, social media, and existing software solutions. Domo offers business intelligence tools and data visualization that provides real time access to business data.

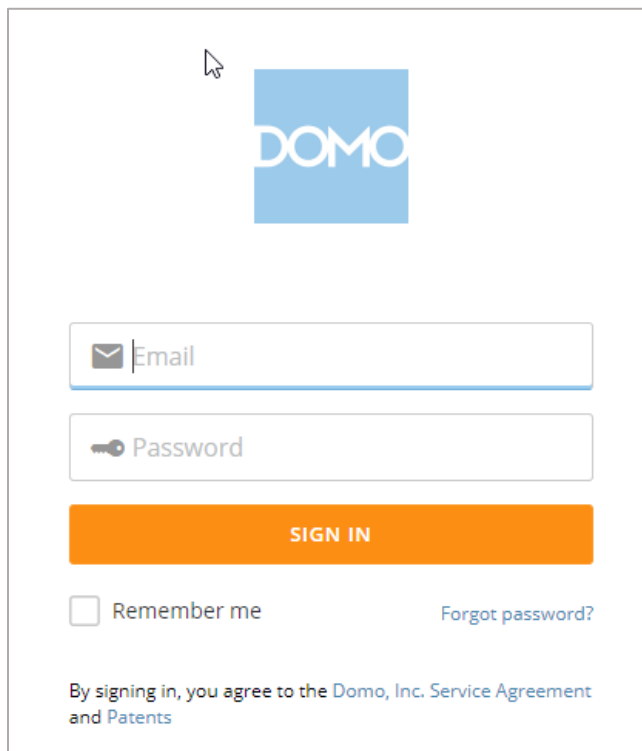

You can connect Domo with NetScaler by using your company's credentials to log on to your account via Single Sign-On (SSO).

## Configuring Domo for Single Sign-On

Configuring Domo for SSO enables administrators to manage their users using NetScaler. Users can securely log on to Domo using their enterprise credentials.

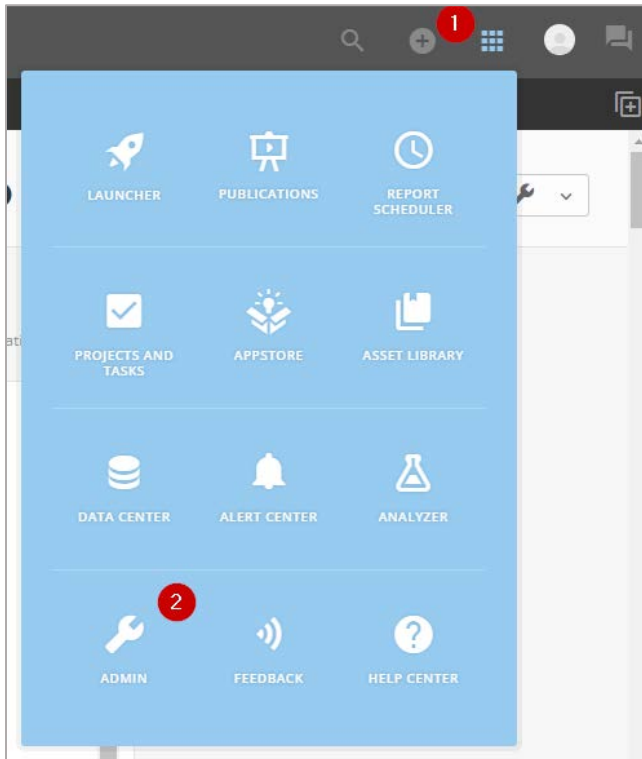

To configure Domo for single sign on through SAML, follow the steps below:

1. In a browser, type the URL in `https://<your-organization>.domo.com` format and press Enter.
2. Log on to your Domo account.

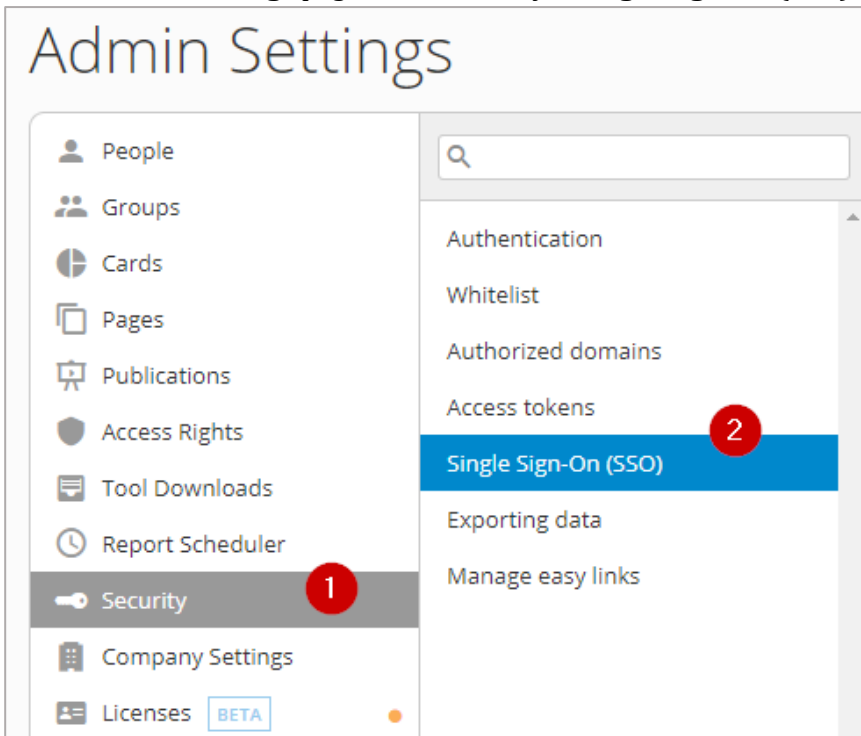

The image shows a screenshot of the Domo login interface. At the top center is the Domo logo, which consists of a blue square with the word "DOMO" in white capital letters. Below the logo are two input fields: the first is labeled "Email" and has an envelope icon on the left; the second is labeled "Password" and has a key icon on the left. Below these fields is a prominent orange button with the text "SIGN IN" in white. Underneath the button, there is a checkbox labeled "Remember me" and a link labeled "Forgot password?". At the bottom of the form, there is a line of text: "By signing in, you agree to the Domo, Inc. Service Agreement and Patents".

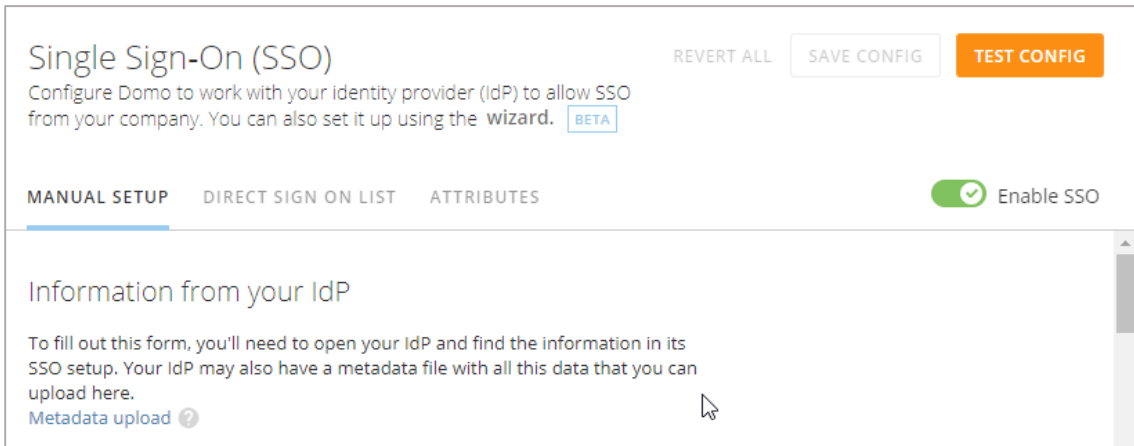

3. On the home page, in the upper right corner, click  > **Admin**.

4. On the **Admin Settings** page, click **Security** > **Single Sign-On (SSO)** > **Enable SSO**.

5. In the **Single Sign-On (SSO)** section, provide the following information.

- i. In the **MANUAL SETUP** section, under **Information from your IdP**, specify the IdP information.  
**Note:** If you want to upload a metadata file, click **Metadata upload** or, to continue adding information manually click **Manual Entry**.
- ii. In the **Identity provider endpoint URL** box, type the URL in `https://<your-organization>/saml/login` format.

- iii. In the **Entity ID** box, type a unique(org url) entity ID.

- iv. In the **Upload x.509 certificate to authenticate request** box, upload the IdP certificate.

Click the arrow to browse to the folder where you saved the IdP provided certificate and upload it.

- vi. In the **Advanced settings** area, select the **On logout, direct people to the following URL** check box and type a redirect URL for logging out.

Advanced settings ?

- Only invited people can access Domo
- On logout, direct people to the following URL:
- Use SAML Relay State to redirect
- Import groups from identity provider
- Show Domo sign-in screen  Skip to identity provider
- Mixed mode login

6. In the upper-right corner, click **SAVE CONFIG.**
7. To test the configuration, click **TEST CONFIG.**

Single Sign-On (SSO)

Configure Domo to work with your identity provider (IdP) to allow SSO from your company. You can also set it up using the [wizard](#). BETA

REVERT ALL

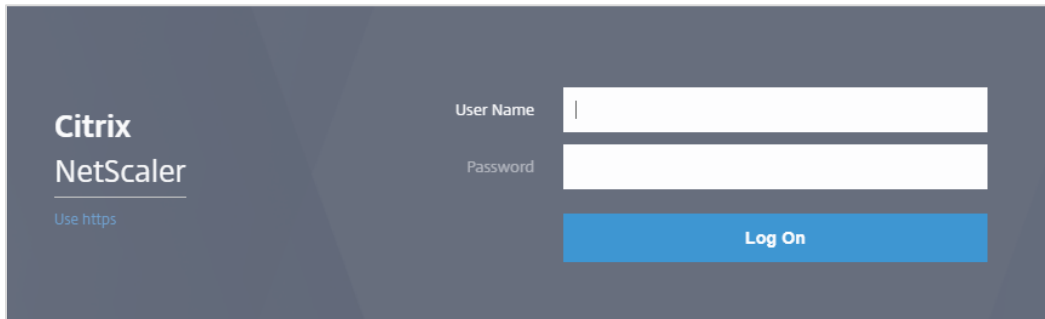

You have completed the required configuration on the service provider which is in this case – Domo.

# Configuring NetScaler for Single Sign-On

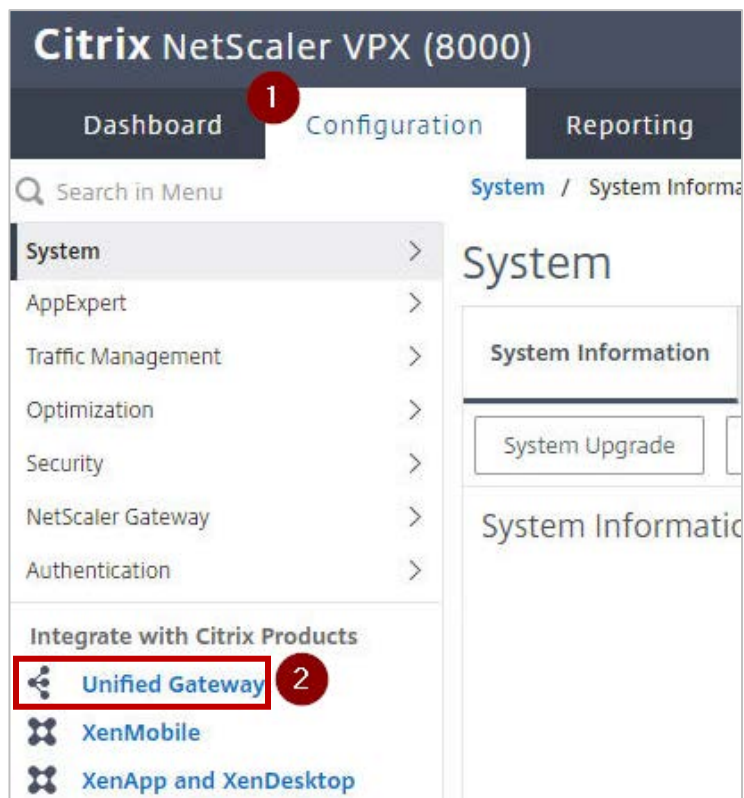

For configuring NetScaler for Domo, you must retrieve and set specific values such as assertion consumer URL, and entity ID.

To configure NetScaler for single sign on through SAML, follow the steps below:

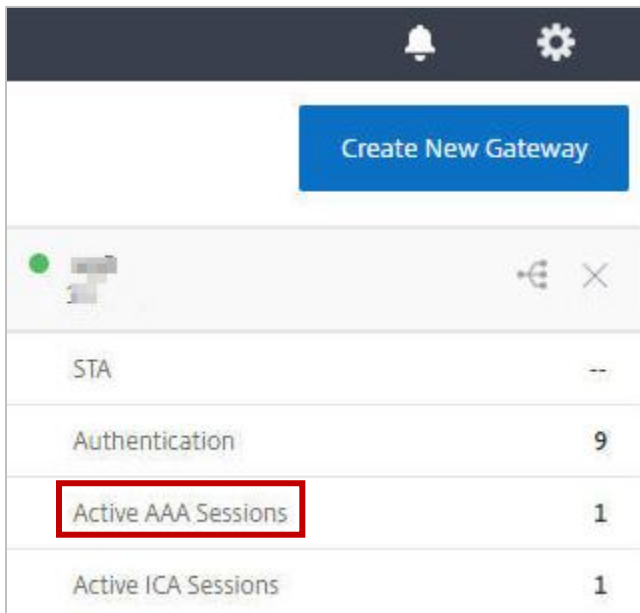

1. Connect to VPN using NetScaler with Unified Gateway.
2. Log on to NetScaler using your user name and password.

3. Click the **Configuration > Unified Gateway**.

4. In the **Dashboard** area, click the configured NetScaler Gateway appliance.

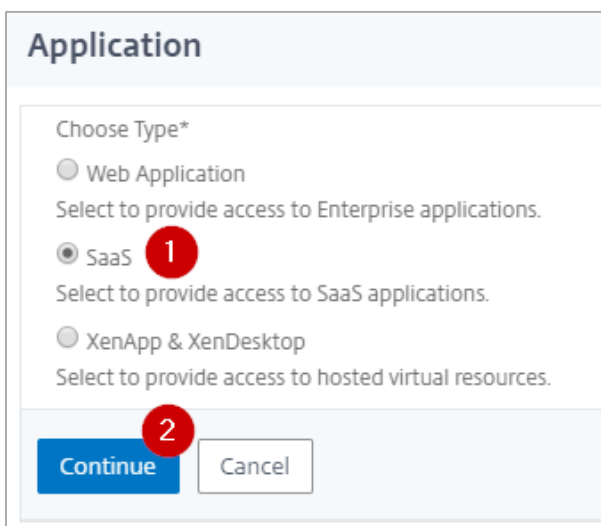

5. Click the edit icon for **Applications** section.

6. For adding a SaaS application, click the plus icon **+** that appears in the edit mode.

7. Click **SaaS > Continue**.

8. Click **Choose from Catalog**.
9. In the **Choose from Catalog** list, click **Domo**.

10. Click **Continue**.
11. In the **Create Application from Template** section, type the name of your SaaS application, in this case Domo, and relevant comments.

**Note:**

An Identity Provider (IdP) provides authentication module to verify users with their corporate network. A Service Provider (SP) supports receiving SSO SAML assertions.

The following table lists the SAML values that you need to copy while configuring SSO for SP and paste the values to appropriate fields while configuring SSO for IdP NetScaler.

Table 2: SSO field values used for SP and IdP configurations

Service Provider (SP) Domo	Identity Provider (IdP) NetScaler
Entity Id	Issuer Name
X.509 certificate	IdP Certificate
SAML Assertion Endpoint URL	Assertion Consumer Service URL

12. In the subsequent section, specify the following information:

The screenshot shows the Domo configuration interface. At the top left is the DOMO logo. Below it are several input fields and buttons, each with a red circle containing a number from 1 to 7. Field 1 is 'Service Provider Login URL\*' with the value 'https://<your-organization>.domo.c'. Field 2 is 'Service Provider ID\*' which is empty. Field 3 is 'Assertion Consumer Service Url\*' with the value 'https://<your-organization>.domo.c'. Field 4 is 'SP Certificate Name' with a dropdown menu and '+' and edit icons. Field 5 is 'IDP Certificate Name\*' with a dropdown menu and '+' and edit icons. Field 6 is 'Issuer Name' with a text input field. At the bottom are 'Continue' and 'Cancel' buttons. The 'Continue' button is highlighted in blue.

- i. **Service Provider Login URL** - enter the URL that you use to access Domo:  
https://<your-organization>.domo.com/auth/saml
- ii. **Service Provider ID** – type a unique identifier for the service provider.
- iii. **Assertion Consumer Service Url\*** – enter the URL that you use to access Domo:  
https://<your-organization>.domo.com/auth/saml
- iv. **SP Certificate Name** – click the appropriate certificate name.  
To obtain this value, access the metadata file:  
https://rpm.newrelic.com:443/accounts/<customer\_AccNo>/sso/saml/metadata
- v. **IDP Certificate Name** – click the appropriate certificate name.  
Refer to the appropriate public key certificate provided by NetScaler which you referred while configuring Domo.
- vi. **Issuer Name** – type a unique name.
- vii. Click **Continue**.

13. Click **Done**.

The Domo logo appears.

14. Click **Done**.

You have completed the NetScaler configuration for Domo.

# Testing the Configuration

## Testing the IdP Initiated Flow

To test the IdP initiated configuration, follow the steps below:

1. Access the IdP URL.
2. Log on to NetScaler appliance using your enterprise credentials.
3. Click **Clientless Access**.
4. On the home page, click **Apps** tab.
5. Click **Domo**.  
Your Domo profile is displayed.  
You have completed testing the IdP initiated flow.

## Testing the SP Initiated Flow

To test the SP initiated configuration, follow the steps below:

1. Access the login URL that is in `https://[subdomain].domo.com/auth/index` format.
2. You are redirected to NetScaler appliance's log in page.
3. Log on to NetScaler appliance using your enterprise credentials.  
  
Your Domo profile is displayed which indicates that you have successfully logged on to Domo.
