

Deprecated Functionality	Alternative Functionality	Alternative command/configuration/operation
SPDY	HT T P/2	Command: set httpProfile <profilename> -http2 ENABLED Ref page: https://docs.citrix.com/en-us/netScaler/12/system/httpconfigurations/configuring-http2.html
SureConnect (SC)	AppQoE	Configuration: # set session life [Global] set appqoe parameter -sessionLife 300 # bind point is LB vserver only, doesn't work on service level like SC # AppQoE use case example (traffic classification and loading screen) Ref page: https://docs.citrix.com/en-us/netScaler/12/appexpert/appqoe.html For more information, see AppQoE Use Cases topic.
Priority Queuing (PQ)	AppQoE	# enable vserver level queueing set appqoe parameter -avgwaitingclient 10 # setting PQ like actions, qDepth and polqDepth are present as well to configure add appqoe action PRI_MEDIUM -priority MEDIUM add appqoe action PRI_HIGH -priority HIGH -priqDepth 1000 add appqoe action PRI_LOW -priority LOW -polqDepth 1000 # four levels of priorities are present : HIGH, LOW, LOWEST, MEDIUM # bind point LB vserver only add appqoe policy text_medium -rule "HT T P.REQ.URL.PAT H.CONTAINS(\".html\")" -action PRI_MEDIUM add appqoe policy image_medium -rule "HT T P.REQ.URL.PAT H.CONTAINS(\".jpg\")" -action PRI_MEDIUM bind lb vserver v2 -policyName text_medium -priority 1 bind lb vserver v2 -policyName image_medium -priority 2 Ref page: https://docs.citrix.com/en-us/netScaler/12/appexpert/appqoe.html
HT T P Denial of Service Protection (HDoSP)	AppQOE	Configuration: enable AppQOE feature set appqoe parameter -dosAttackT hresh 100 set appqoe parameter -avgwaitingclient 100 set appqoe parameter -MaxAltRespBandWidth 100 add appqoe action DOS_SIMPLE -dosAction simpleResponse add appqoe policy POL_DOS_SIMPLE -rule "ANALYT ICS.ST REAM(\"Top_URL\").IS_TOP_FREQUENT S(10)" -action DOS_SIMPLE bind lb vserver v1 -policyName POL_DOS_SIMPLE -priority 3 Ref page: https://docs.citrix.com/en-us/netScaler/12/appexpert/appqoe.html
HT MLInjection	AppFlow with Client Side Measurements	Configuration Steps: 1. enable feature AppFlow 2. add appflow action with clientside measurements enabled

		<p>1. add appflow action Appflow_act1 -collectors collector_1 - clientSideMeasurements ENABLED</p> <p>3. add appflow policy with this action and bind to vserver/AppFlow global.</p> <p>Ref page: https://docs.citrix.com/en-us/netscaler/12/ns-ag-appflow-intro-wrappercon.html</p>
Filter	<p>1. RESET /DROP on request side,</p> <p>2. ERRORCODE;</p> <p>3. RESET /DROP on response side,</p> <p>4. ADD/CORRUPT</p> <p>5. FORWARD</p>	<p>Filter actions:</p> <ol style="list-style-type: none"> 1. Use Responder RESET /DROP 2. Use Responder RESPONDWITH or REDIRECT 3. Use Rewrite RESET /DROP 4. Use Rewrite INSERT_HTTP_HEADER/CORRUPT_HTTP_HEADER 5. Use CS policy and action that select appropriate LB Vserver that can select that service. <p>Note: Everything is done using Advanced policies.</p> <p>Ref pages: Responder: https://docs.citrix.com/en-us/netscaler/12/appexpert/responder.html Rewrite: https://docs.citrix.com/en-us/netscaler/12/appexpert/rewrite.html</p>
Q and S prefixes in Advanced expressions	HTTP.REQ and HTTP.RES	<p>Ref pages: https://docs.citrix.com/en-us/netscaler/12/appexpert/policies-andexpressions/ns-pi-adv-expr-ref.html</p>
Pattern function in Rewrite action	-search Rewrite action parameter	<p>Ref page: https://docs.citrix.com/en-us/netscaler/12/appexpert/rewrite/configuring-rewrite-action.html</p>
AAA preauthentication policy	Nfactor authentication (advanced EPA policy)	<p>Add authentication epaaction EPA_ACT</p> <p>add authentication policy epa1 -rule true -action EPA_ACT</p> <p>Ref page: https://docs.citrix.com/en-us/netscaler/12/aaa-tm/multi-factor/nfactor-authentication/nfactor-authentication-configuring.html</p>

The following table is a list of features using Classic policy expressions that are deprecated and its alternative Advanced expression. As a general note, Classic Policy Engine (CPE) is deprecated and its alternative, Advanced policy infrastructure is used. For more information, see [Configuring Advanced Policy Infrastructure](#) topic.

Deprecated Policy	Deprecated Policy	Deprecated Policy
Application Firewall Classic policy	Application Firewall Advanced policy	https://docs.citrix.com/en-us/netscaler/12/applicationfirewall/configuring-application-firewall/using-cli.html
Compression Classic policy	Compression Advanced policy	https://docs.citrix.com/en-us/netscaler/12/optimization/httpcompression/configuring-http-compression.html
Classic cache redirection policy	Advanced redirection policies	https://docs.citrix.com/en-us/netscaler/12/netscaler-cache-redirectiongen-wrapper-10-con/cache-redirection-policies/configure-cacheredirection-policies.html
Content Switching Classic policy	Content Switching Advanced policy	https://docs.citrix.com/en-us/netscaler/12/content-switching/basicconfiguration/configure-policies.html
SSL Classic policy	Content Switching Advanced policy	https://docs.citrix.com/en-us/netscaler/12/ssl/config-ssl-actionspolicies/config-default-syntax-policy.html
Audit SYSLOG Policy	Advanced Audit SYSLOG Policy	https://docs.citrix.com/en-us/netscaler/12/system/auditlogging/configuring-audit-logging.html
Audit NSLOG policy	Advanced Audit NSLOG Policy	https://docs.citrix.com/en-us/netscaler/12/system/auditlogging/configuring-audit-logging.html
Authentication local policy	Advanced Authentication policy (“add authentication Policy”)	https://docs.citrix.com/en-us/netscaler/12/aaa-tm/configure-aaapolicies/ns-aaa-setup-policies-authntcn-tsk/ns-aaa-setup-policiesauthntcn-advanced-tsk.html
RADIUS Authentication policy	Advanced Authentication policy (“add authentication Policy”)	https://docs.citrix.com/en-us/netscaler/12/aaa-tm/configure-aaapolicies/ns-aaa-setup-policies-authntcn-tsk/ns-aaa-setup-policiesauthntcn-advanced-tsk.html
