Provisioning Services 7.13

Feb 22, 2017

[New in this
Release](#)

[Fixed issues](#)

[Known issues](#)

[Features removed from
future releases](#)

[System
requirements](#)

[Provisioning
Services product
overview](#)

[Provisioning Services
product infrastructure](#)

[Provisioning Services
administrator roles](#)

[Product utilities](#)

[Managing vDisks](#)

[Creating vDisks](#)

[Prerequisites for deploying
vDisks](#)

[Configuring the vDisk
access mode](#)

[Selecting the write cache
destination for standard
vDisk images](#)

[Configuring a vDisk for
Microsoft Volume
Licensing](#)

[Managing load balancing
across servers](#)

[Support for replicated
vDisk storage](#)

[Exporting and importing
vDisks](#)

[Releasing vDisk locks](#)

[Copying and pasting vDisk](#)

Upgrading a Provisioning Services farm

Upgrading Provisioning Servers

Upgrading vDisks

Installing and configuring Provisioning Services

Pre-installation tasks

Licensing

Upgrading a Provisioning Services target device vDisk using in-place upgrade

Configuring UEFI pre-boot environments

Installing Provisioning Services Server software

Configuring the farm

Running the Configuration Wizard silently

Installing Provisioning Services Console software

Adding additional Provisioning Servers

Preparing a master target

properties

Adding existing vDisks to a vDisk pool or store

Backing up a vDisk

Viewing vDisk usage

Deleting cache on a difference disk

vDisk properties

Assigning vDisks and versions to target devices

Updating vDisks

Retiring or deleting vDisks

Managing device collections

Device collection properties

Creating a device collection

Importing target devices into a collection

Deleting a collection

Refreshing a collection in the console

Booting target devices within a collection

Restarting target devices within a collection

Shutting down target

[device for imaging](#)
