

Configure LeanKit for Single Sign-On

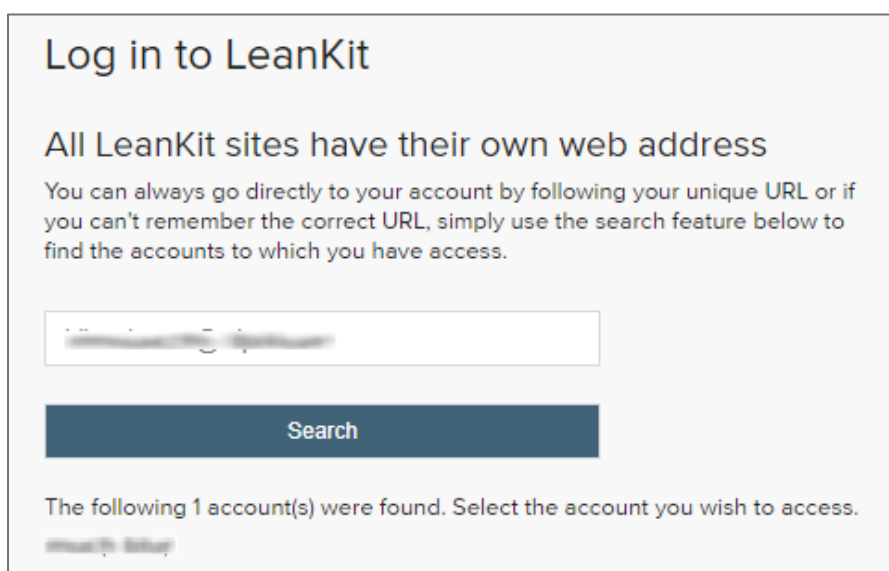

Configuring LeanKit for single sign-on (SSO) enables administrators to manage users of Citrix ADC. Users can securely log on to LeanKit by using the enterprise credentials.

Prerequisite

Browser Requirements: Internet Explorer 11 and above

To configure LeanKit for SSO by using SAML:

1. In a browser, type <https://login.leankit.com/Account/Membership/Login> and press **Enter**.
2. Type your LeanKit admin email address and click **Search**.

The screenshot shows the 'Log in to LeanKit' page. It includes a heading, a sub-heading 'All LeanKit sites have their own web address', and a paragraph explaining that users can go directly to their account or use a search feature. Below this is a search input field with a blurred email address, a 'Search' button, and a message stating 'The following 1 account(s) were found. Select the account you wish to access.' followed by a partially visible account name.

Note: The account associated with the respective email address is displayed.

3. To enable and configure SSO, the user must contact LeanKit support team and provide them with the following:

Required Information	Description
Primary SSO Endpoint	IdP logon url
Public Signing Certificate	Copy and paste the IdP certificate. The IdP certificate must begin and end with -----Begin Certificate----- and -----End Certificate----- Note: The IdP metadata is provided by Citrix and can be accessed from the link below. The link is displayed while configuring SSO settings for your app.

	<a href="https://gateway.cloud.com/idp/saml/<citrixcloudcust id>/<app id>/idp_metadata.xml">https://gateway.cloud.com/idp/saml/<citrixcloudcust id>/<app id>/idp_metadata.xml
--	---

Note: The support team will configure the SP from the backend.
