

# Configure FOSSA for Single Sign-On

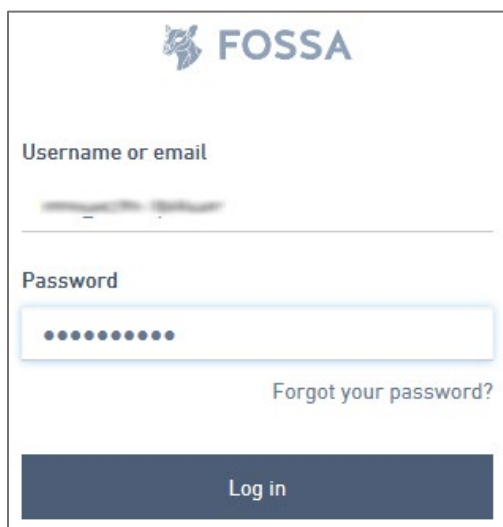

Configuring FOSSA for single sign-on (SSO) enables administrators to manage users of Citrix ADC. Users can securely log on to FOSSA by using the enterprise credentials.

## Prerequisite

Browser Requirements: Internet Explorer 11 and above

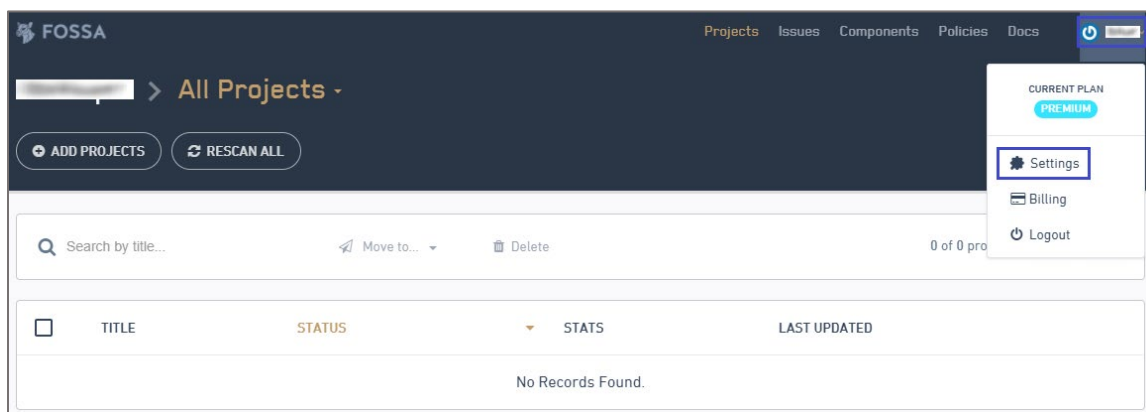

## To configure FOSSA for SSO by using SAML:

1. In a browser, type <https://app.fossa.io/account/login> and press **Enter**.
2. Type your FOSSA admin account credentials (**Username or email address** and **Password**) and click **Log in**.

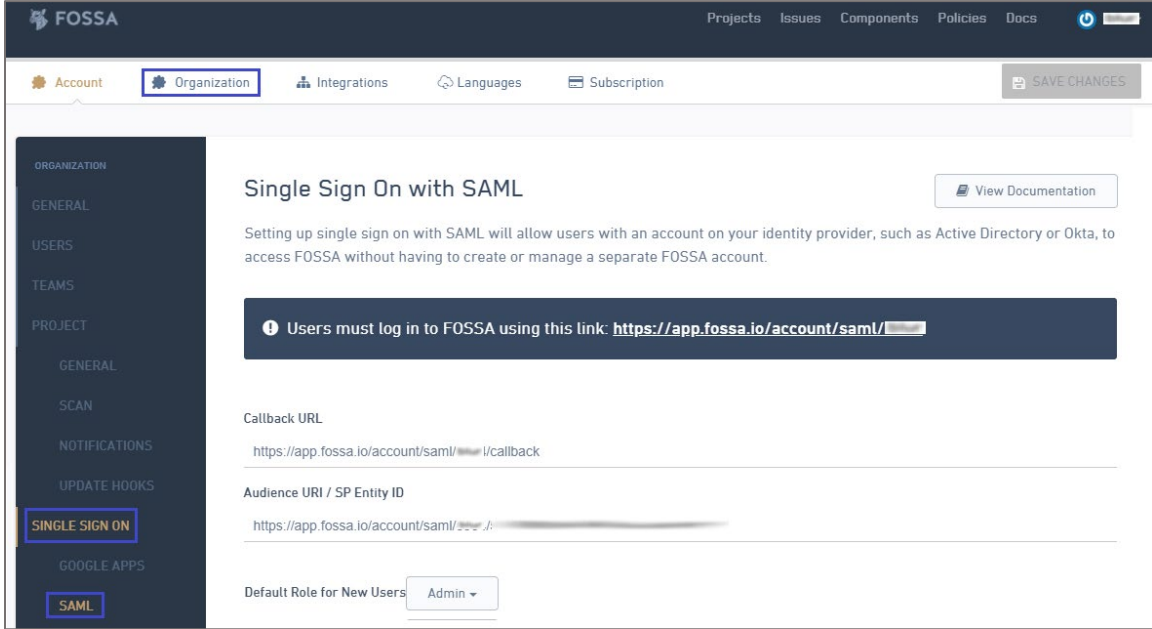

The screenshot shows the FOSSA login page. At the top left is the FOSSA logo. Below it is a form with two input fields: "Username or email" and "Password". The "Password" field is masked with dots. To the right of the "Password" field is a link that says "Forgot your password?". At the bottom of the form is a dark blue button labeled "Log in".

3. In the dashboard page, click the user account in the top-right corner and select **Settings**.

The screenshot shows the FOSSA dashboard. At the top left is the FOSSA logo. To the right of the logo are navigation links: "Projects", "Issues", "Components", "Policies", "Docs", and a user account icon. Below the navigation links is a breadcrumb trail: "All Projects". There are two buttons: "ADD PROJECTS" and "RESCAN ALL". Below these buttons is a search bar with the text "Search by title...". To the right of the search bar are icons for "Move to..." and "Delete". At the bottom right of the dashboard is a table with columns: "TITLE", "STATUS", "STATS", and "LAST UPDATED". The table is currently empty, with the text "No Records Found." below it. In the top right corner, there is a user account menu with options: "Settings", "Billing", and "Logout". The "Settings" option is highlighted with a blue box.

- Click **Organization > SINGLE SIGN ON > SAML** from the left pane.

- In the **Single Sign On with SAML** page, enter the values for the following fields:

Required Information	Description
Callback URL	ACS URL
Audience URI / SP Entity ID	Entity ID
Default Role for New Users	Select <b>Admin</b> from the drop-down list.
Identity Provider Single Sign On URL	IdP logon URL
Certificate	Copy and paste the IdP certificate. The IdP certificate must begin and end with -----Begin Certificate----- and -----End Certificate----- <b>Note:</b> The IdP metadata is provided by Citrix and can be accessed from the link below. The link is displayed while configuring SSO settings for your app. <a href="https://gateway.cloud.com/idp/saml/&lt;citrixcloudcust id&gt;/&lt;app id&gt;/idp_metadata.xml">https://gateway.cloud.com/idp/saml/&lt;citrixcloudcust id&gt;/&lt;app id&gt;/idp_metadata.xml</a>

## Single Sign On with SAML View Documentation

Setting up single sign on with SAML will allow users with an account on your identity provider, such as Active Directory or Okta, to access FOSSA without having to create or manage a separate FOSSA account.

**!** Users must log in to FOSSA using this link: <https://app.fossa.io/account/saml/>

Callback URL

Audience URI / SP Entity ID

Default Role for New Users

Identity Provider Single Sign On URL

Certificate

6. Finally, scroll up and click **SAVE CHANGES**.
